

PAF65 α Polyclonal Antibody
Catalog # AP71748**Specification**

PAF65 α Polyclonal Antibody - Product Information

Application	WB
Primary Accession	O9Y6J9
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal

PAF65 α Polyclonal Antibody - Additional Information**Gene ID** 10629**Other Names**

TAF6L; PAF65A; TAF6-like RNA polymerase II p300/CBP-associated factor-associated factor 65 kDa subunit 6L; PCAF-associated factor 65-alpha; PAF65-alpha

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/40000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

PAF65 α Polyclonal Antibody - Protein Information**Name** TAF6L ([HGNC:17305](#))**Synonyms** PAF65A**Function**

Functions as a component of the PCAF complex. The PCAF complex is capable of efficiently acetylating histones in a nucleosomal context. The PCAF complex could be considered as the human version of the yeast SAGA complex (Probable). With TAF5L, acts as an epigenetic regulator essential for somatic reprogramming. Regulates target genes through H3K9ac deposition and MYC recruitment which trigger MYC regulatory network to orchestrate gene expression programs to control embryonic stem cell state. Functions with MYC to activate target gene expression through RNA polymerase II pause release (By similarity).

Cellular Location

Nucleus

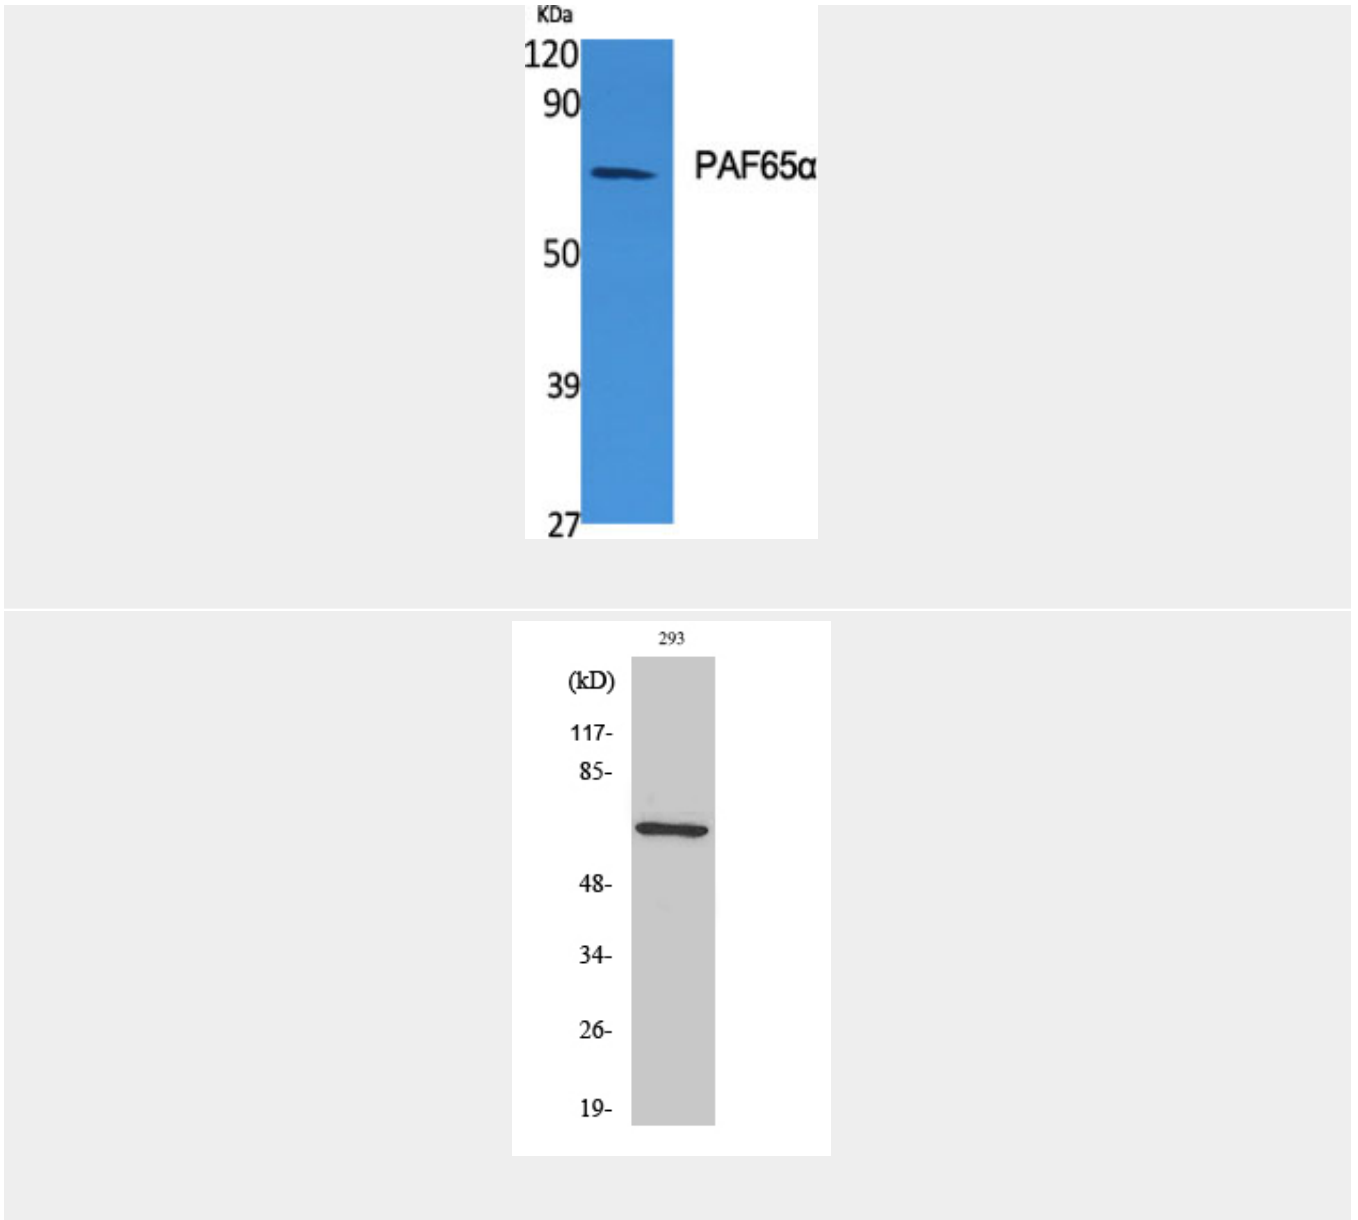

PAF65 α Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
