

MOX1 (Meox1) Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7267b

Specification

MOX1 (Meox1) Antibody (C-term) - Product Information

| | |
|-------------------|---------------------------|
| Application | WB,E |
| Primary Accession | P50221 |
| Other Accession | NP_004518 |
| Reactivity | Human |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | Rabbit IgG |
| Calculated MW | 27997 |
| Antigen Region | 223-254 |

MOX1 (Meox1) Antibody (C-term) - Additional Information

Gene ID 4222

Other Names

Homeobox protein MOX-1, Mesenchyme homeobox 1, MEOX1, MOX1

Target/Specificity

This MOX1 (Meox1) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 223-254 amino acids from the C-terminal region of human MOX1 (Meox1).

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MOX1 (Meox1) Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

MOX1 (Meox1) Antibody (C-term) - Protein Information

Name MEOX1

Synonyms MOX1

Function Mesodermal transcription factor that plays a key role in somitogenesis and is specifically required for sclerotome development. Required for maintenance of the sclerotome polarity and formation of the cranio-cervical joints (PubMed:[23290072](#), PubMed:[24073994](#)). Binds specifically to the promoter of target genes and regulates their expression. Activates expression of NKX3-2 in the sclerotome. Activates expression of CDKN1A and CDKN2A in endothelial cells, acting as a regulator of vascular cell proliferation. While it activates CDKN1A in a DNA-dependent manner, it activates CDKN2A in a DNA-independent manner. Required for hematopoietic stem cell (HSCs) induction via its role in somitogenesis: specification of HSCs occurs via the deployment of a specific endothelial precursor population, which arises within a sub-compartment of the somite named endotome.

Cellular Location

Nucleus {ECO:0000250|UniProtKB:P32442}. Cytoplasm {ECO:0000250|UniProtKB:P32442}. Note=Localizes predominantly in the nucleus. {ECO:0000250|UniProtKB:P32442}

MOX1 (Meox1) Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

MOX1 (Meox1) Antibody (C-term) - Images

Meox1 Antibody (C-term) (Cat. #AP7267b) western blot analysis in 293 cell line lysates (35ug/lane). This demonstrates the Meox1 antibody detected the Meox1 protein (arrow).

MOX1 (Meox1) Antibody (C-term) - Background

Meox1 is a member of a subfamily of non-clustered, diverged, antennapedia-like homeobox-containing genes. This protein may play a role in the molecular signaling network

regulating somite development.
