

NCX1 Polyclonal Antibody

Catalog # AP73286

### Specification

## NCX1 Polyclonal Antibody - Product Information

Application Primary Accession Reactivity Host Clonality WB <u>P32418</u> Human, Mouse, Rat Rabbit Polyclonal

## NCX1 Polyclonal Antibody - Additional Information

Gene ID 6546

**Other Names** SLC8A1; CNC; NCX1; Sodium/calcium exchanger 1; Na(+)/Ca(2+)-exchange protein 1

**Dilution** WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/5000. Not yet tested in other applications.

**Format** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions** -20°C

## NCX1 Polyclonal Antibody - Protein Information

Name SLC8A1

#### Function

Mediates the exchange of one Ca(2+) ion against three to four Na(+) ions across the cell membrane, and thereby contributes to the regulation of cytoplasmic Ca(2+) levels and Ca(2+)-dependent cellular processes (PubMed:<a

href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1374913" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1476165</a>). Contributes to Ca(2+) transport during excitation-contraction coupling in muscle (PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1374913" target="\_blank">1476165</a>). In a first phase, voltage-gated channels mediate the rapid increase of cytoplasmic Ca(2+) levels due to release of Ca(2+) stores from the endoplasmic reticulum (PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1374913" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1374913" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1476165</a>). SLC8A1 mediates the export of Ca(2+) from the cell

levels rapidly return to baseline (PubMed:<a href="http://www.uniprot.org/citations/11241183" target="\_blank">11241183</a>, PubMed:<a href="http://www.uniprot.org/citations/1374913" target="\_blank">1374913</a>, PubMed:<a href="http://www.uniprot.org/citations/1476165" target="\_blank">1476165</a>). Required for normal embryonic heart development and the onset of heart contractions (By similarity).

# Cellular Location

Cell membrane; Multi-pass membrane protein

#### **Tissue Location**

Detected primarily in heart and at lower levels in brain (PubMed:1374913). Expressed in cardiac sarcolemma, brain, kidney, liver, pancreas, skeletal muscle, placenta and lung (PubMed:1476165)

## **NCX1 Polyclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

# NCX1 Polyclonal Antibody - Background

Mediates the exchange of one Ca(2+) ion against three to four Na(+) ions across the cell membrane, and thereby contributes to the regulation of cytoplasmic Ca(2+) levels and Ca(2+)dependent cellular processes (PubMed:1374913, PubMed:11241183, PubMed:1476165). Contributes to Ca(2+) transport during excitation-contraction coupling in muscle. In a first phase, voltage-gated channels mediate the rapid increase of cytoplasmic Ca(2+) levels due to release of Ca(2+) stores from the endoplasmic reticulum. SLC8A1 mediates the export of Ca(2+) from the cell during the next phase, so that cytoplasmic Ca(2+) levels rapidly return to baseline. Required for normal embryonic heart development and the onset of heart contractions.
