

Synapsin-1 Polyclonal Antibody
Catalog # AP73920**Specification****Synapsin-1 Polyclonal Antibody - Product Information**

Application	WB
Primary Accession	P17600
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal

Synapsin-1 Polyclonal Antibody - Additional Information**Gene ID** 6853**Other Names**

SYN1; Synapsin-1; Brain protein 4.1; Synapsin I

Dilution

WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

Synapsin-1 Polyclonal Antibody - Protein Information**Name** SYN1**Function**

Neuronal phosphoprotein that coats synaptic vesicles, and binds to the cytoskeleton. Acts as a regulator of synaptic vesicles trafficking, involved in the control of neurotransmitter release at the pre-synaptic terminal (PubMed:21441247, PubMed:23406870). Also involved in the regulation of axon outgrowth and synaptogenesis (By similarity). The complex formed with NOS1 and CAPON proteins is necessary for specific nitric-oxid functions at a presynaptic level (By similarity).

Cellular Location

Synapse {ECO:0000250|UniProtKB:O88935}. Golgi apparatus {ECO:0000250|UniProtKB:O88935}. Presynapse. Cytoplasmic vesicle, secretory vesicle, synaptic vesicle {ECO:0000250|UniProtKB:P09951}. Note=Dissociates from synaptic vesicles and redistributes into the axon during action potential firing, in a step that precedes fusion of vesicles with the plasma membrane. Reclusters to presynapses after the cessation of synaptic activity. {ECO:0000250|UniProtKB:P09951}

Synapsin-1 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Synapsin-1 Polyclonal Antibody - Background

Neuronal phosphoprotein that coats synaptic vesicles, binds to the cytoskeleton, and is believed to function in the regulation of neurotransmitter release. The complex formed with NOS1 and CAPON proteins is necessary for specific nitric-oxid functions at a presynaptic level.
