

IKK γ Polyclonal Antibody
Catalog # AP74068**Specification****IKK γ Polyclonal Antibody - Product Information**

Application	WB
Primary Accession	Q9Y6K9
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal

IKK γ Polyclonal Antibody - Additional Information

Gene ID 8517

Other Names

NF-kappa-B essential modulator (NEMO) (FIP-3) (I κ B kinase-associated protein 1) (IKKAP1) (Inhibitor of nuclear factor kappa-B kinase subunit gamma) (I-kappa-B kinase subunit gamma) (IKK-gamma) (IKKG) (I κ B kinase subunit gamma) (NF-kappa-B essential modifier)

Dilution

WB~~WB 1:500-2000,IHC-p 1:500-200, ELISA 1:10000-20000

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

IKK γ Polyclonal Antibody - Protein InformationName IKBKG ([HGNC:5961](#))

Synonyms FIP3, NEMO

Function

Regulatory subunit of the IKK core complex which phosphorylates inhibitors of NF-kappa-B thus leading to the dissociation of the inhibitor/NF-kappa-B complex and ultimately the degradation of the inhibitor (PubMed:[14695475](http://www.uniprot.org/citations/14695475) target="_blank">14695475, PubMed:[20724660](http://www.uniprot.org/citations/20724660) target="_blank">20724660, PubMed:[21518757](http://www.uniprot.org/citations/21518757) target="_blank">21518757, PubMed:[9751060](http://www.uniprot.org/citations/9751060) target="_blank">9751060). Its binding to scaffolding polyubiquitin plays a key role in IKK activation by multiple signaling receptor pathways (PubMed:[16547522](http://www.uniprot.org/citations/16547522) target="_blank">16547522, PubMed:[18287044](http://www.uniprot.org/citations/18287044) target="_blank">18287044, PubMed:[19033441](http://www.uniprot.org/citations/19033441) target="_blank">19033441, PubMed:[19185524](http://www.uniprot.org/citations/19185524) target="_blank">19185524, PubMed:[19185524](#) target="_blank">19185524).

href="http://www.uniprot.org/citations/21606507" target="_blank">21606507, PubMed:27777308, PubMed:33567255). Can recognize and bind both 'Lys-63'-linked and linear polyubiquitin upon cell stimulation, with a much higher affinity for linear polyubiquitin (PubMed:16547522, PubMed:18287044, PubMed:19033441, PubMed:19185524, PubMed:21606507, PubMed:27777308). Could be implicated in NF-kappa-B-mediated protection from cytokine toxicity. Essential for viral activation of IRF3 (PubMed:19854139). Involved in TLR3- and IFIH1-mediated antiviral innate response; this function requires 'Lys- 27'-linked polyubiquitination (PubMed:20724660).

Cellular Location

Cytoplasm. Nucleus Note=Sumoylated NEMO accumulates in the nucleus in response to genotoxic stress.

Tissue Location

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas

IKK γ Polyclonal Antibody - Background

Regulatory subunit of the IKK core complex which phosphorylates inhibitors of NF-kappa-B thus leading to the dissociation of the inhibitor/NF-kappa-B complex and ultimately the degradation of the inhibitor. Its binding to scaffolding polyubiquitin seems to play a role in IKK activation by multiple signaling receptor pathways. However, the specific type of polyubiquitin recognized upon cell stimulation (either 'Lys-63'- linked or linear polyubiquitin) and its functional importance is reported conflictingly. Also considered to be a mediator for TAX activation of NF-kappa-B. Could be implicated in NF-kappa-B- mediated protection from cytokine toxicity. Essential for viral activation of IRF3. Involved in TLR3- and IFIH1-mediated antiviral innate response; this function requires 'Lys-27'-linked polyubiquitination.
