

CD3 ζ Polyclonal Antibody
Catalog # AP74215**Specification**

CD3 ζ Polyclonal Antibody - Product Information

Application	IHC
Primary Accession	P20963
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

CD3 ζ Polyclonal Antibody - Additional Information**Gene ID** 919**Other Names**

T-cell surface glycoprotein CD3 zeta chain (T-cell receptor T3 zeta chain) (CD antigen CD247)

Dilution

IHC~~IHC-p 1:50-200, ELISA 1:10000-20000

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

CD3 ζ Polyclonal Antibody - Protein Information**Name** CD247**Synonyms** CD3Z, T3Z, TCRZ**Function**

Part of the TCR-CD3 complex present on T-lymphocyte cell surface that plays an essential role in adaptive immune response. When antigen presenting cells (APCs) activate T-cell receptor (TCR), TCR-mediated signals are transmitted across the cell membrane by the CD3 chains CD3D, CD3E, CD3G and CD3Z. All CD3 chains contain immunoreceptor tyrosine-based activation motifs (ITAMs) in their cytoplasmic domain. Upon TCR engagement, these motifs become phosphorylated by Src family protein tyrosine kinases LCK and FYN, resulting in the activation of downstream signaling pathways (PubMed: [1384049](http://www.uniprot.org/citations/1384049), PubMed: [1385158](http://www.uniprot.org/citations/1385158), PubMed: [2470098](http://www.uniprot.org/citations/2470098), PubMed: [7509083](http://www.uniprot.org/citations/7509083)). CD3Z ITAMs phosphorylation creates multiple docking sites for the protein kinase ZAP70 leading to ZAP70 phosphorylation and its conversion into a catalytically active enzyme (PubMed: [7509083](http://www.uniprot.org/citations/7509083), PubMed: [7509083](http://www.uniprot.org/citations/7509083)). Plays an important role in intrathymic T-cell differentiation.

Additionally, participates in the activity-dependent synapse formation of retinal ganglion cells (RGCs) in both the retina and dorsal lateral geniculate nucleus (dLGN) (By similarity).

Cellular Location

Cell membrane {ECO:0000250|UniProtKB:P24161}; Single-pass type I membrane protein

Tissue Location

CD3Z is expressed in normal lymphoid tissue and in peripheral blood mononuclear cells (PBMCs) (PubMed:11722641)

CD3 ζ Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
