

Phospho-Presenilin 1 (Ser310) Rabbit mAb
Catalog # AP74958**Specification**

Phospho-Presenilin 1 (Ser310) Rabbit mAb - Product Information

Application	WB
Primary Accession	P49768
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	52668

Phospho-Presenilin 1 (Ser310) Rabbit mAb - Additional Information

Gene ID 5663

Other Names

PSEN1

Dilution

WB~~1/500-1/1000

Format

Liquid

Phospho-Presenilin 1 (Ser310) Rabbit mAb - Protein Information

Name PSEN1

Synonyms AD3, PS1, PSNL1

Function

Catalytic subunit of the gamma-secretase complex, an endoprotease complex that catalyzes the intramembrane cleavage of integral membrane proteins such as Notch receptors and APP (amyloid- beta precursor protein) (PubMed: [10206644](http://www.uniprot.org/citations/10206644) target="_blank">10206644, PubMed: [10545183](http://www.uniprot.org/citations/10545183) target="_blank">10545183, PubMed: [10593990](http://www.uniprot.org/citations/10593990) target="_blank">10593990, PubMed: [10811883](http://www.uniprot.org/citations/10811883) target="_blank">10811883, PubMed: [10899933](http://www.uniprot.org/citations/10899933) target="_blank">10899933, PubMed: [12679784](http://www.uniprot.org/citations/12679784) target="_blank">12679784, PubMed: [12740439](http://www.uniprot.org/citations/12740439) target="_blank">12740439, PubMed: [15274632](http://www.uniprot.org/citations/15274632) target="_blank">15274632, PubMed: [20460383](http://www.uniprot.org/citations/20460383) target="_blank">20460383, PubMed: [25043039](http://www.uniprot.org/citations/25043039) target="_blank">25043039, PubMed: [26280335](http://www.uniprot.org/citations/26280335) target="_blank">26280335, PubMed: [28269784](http://www.uniprot.org/citations/28269784) target="_blank">28269784, PubMed: [30598546](http://www.uniprot.org/citations/30598546) target="_blank">30598546, PubMed: [30630874](http://www.uniprot.org/citations/30630874) target="_blank">30630874

target="_blank">30630874). Requires the presence of the other members of the gamma-secretase complex for protease activity (PubMed:15274632, PubMed:25043039, PubMed:26280335, PubMed:30598546, PubMed:30630874). Plays a role in Notch and Wnt signaling cascades and regulation of downstream processes via its role in processing key regulatory proteins, and by regulating cytosolic CTNNB1 levels (PubMed:10593990, PubMed:10811883, PubMed:10899933, PubMed:9738936). Stimulates cell-cell adhesion via its interaction with CDH1; this stabilizes the complexes between CDH1 (E-cadherin) and its interaction partners CTNNB1 (beta-catenin), CTNND1 and JUP (gamma-catenin) (PubMed:11953314). Under conditions of apoptosis or calcium influx, cleaves CDH1 (PubMed:11953314). This promotes the disassembly of the complexes between CDH1 and CTNND1, JUP and CTNNB1, increases the pool of cytoplasmic CTNNB1, and thereby negatively regulates Wnt signaling (PubMed:11953314, PubMed:9738936). Required for normal embryonic brain and skeleton development, and for normal angiogenesis (By similarity). Mediates the proteolytic cleavage of EphB2/CTF1 into EphB2/CTF2 (PubMed:17428795, PubMed:28269784). The holoprotein functions as a calcium-leak channel that allows the passive movement of calcium from endoplasmic reticulum to cytosol and is therefore involved in calcium homeostasis (PubMed:16959576, PubMed:25394380). Involved in the regulation of neurite outgrowth (PubMed:15004326, PubMed:20460383). Is a regulator of presynaptic facilitation, spike transmission and synaptic vesicles replenishment in a process that depends on gamma-secretase activity. It acts through the control of SYT7 presynaptic expression (By similarity).

Cellular Location

Endoplasmic reticulum. Endoplasmic reticulum membrane; Multi-pass membrane protein. Golgi apparatus membrane; Multi-pass membrane protein. Cytoplasmic granule. Cell membrane; Multi-pass membrane protein. Cell projection, growth cone. Early endosome. Early endosome membrane; Multi-pass membrane protein. Cell projection, neuron projection. Cell projection, axon {ECO:0000250|UniProtKB:Q4JIM4}. Synapse {ECO:0000250|UniProtKB:Q4JIM4}. Note=Translocates with bound NOTCH1 from the endoplasmic reticulum and/or Golgi to the cell surface (PubMed:10593990). Colocalizes with CDH1/2 at sites of cell-cell contact. Colocalizes with CTNNB1 in the endoplasmic reticulum and the proximity of the plasma membrane (PubMed:9738936). Also present in azurophil granules of neutrophils (PubMed:11987239). Colocalizes with UBQLN1 in the cell membrane and in cytoplasmic juxtannuclear structures called aggresomes (PubMed:21143716).

Tissue Location

Detected in azurophilic granules in neutrophils and in platelet cytoplasmic granules (at protein level) (PubMed:11987239) Expressed in a wide range of tissues including various regions of the brain, liver, spleen and lymph nodes (PubMed:7596406, PubMed:8574969, PubMed:8641442).

Phospho-Presenilin 1 (Ser310) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
