

# Phospho-c-Jun (Ser63) Rabbit mAb

Catalog # AP74977

#### Specification

## Phospho-c-Jun (Ser63) Rabbit mAb - Product Information

Application **Primary Accession** Reactivity Host Clonality Calculated MW

WB, IHC P05412 Human, Mouse, Rat Rabbit **Monoclonal Antibody** 35676

#### Phospho-c-Jun (Ser63) Rabbit mAb - Additional Information

Gene ID 3725

**Other Names** JUN

Dilution WB~~1/500-1/1000 IHC~~1/50-1/100

Format Liquid

## Phospho-c-Jun (Ser63) Rabbit mAb - Protein Information

Name JUN

#### **Function**

Transcription factor that recognizes and binds to the AP-1 consensus motif 5'-TGA[GC]TCA-3' (PubMed:<a href="http://www.uniprot.org/citations/10995748" target=" blank">10995748</a>, PubMed:<a href="http://www.uniprot.org/citations/22083952" target=" blank">22083952</a>). Heterodimerizes with proteins of the FOS family to form an AP-1 transcription complex, thereby enhancing its DNA binding activity to the AP-1 consensus sequence 5'-TGA[GC]TCA-3' and enhancing its transcriptional activity (By similarity). Together with FOSB, plays a role in activation-induced cell death of T cells by binding to the AP-1 promoter site of FASLG/CD95L, and inducing its transcription in response to activation of the TCR/CD3 signaling pathway (PubMed: <a href="http://www.uniprot.org/citations/12618758" target=" blank">12618758</a>). Promotes activity of NR5A1 when phosphorylated by HIPK3 leading to increased steroidogenic gene expression upon cAMP signaling pathway stimulation (PubMed:<a

href="http://www.uniprot.org/citations/17210646" target=" blank">17210646</a>). Involved in activated KRAS-mediated transcriptional activation of USP28 in colorectal cancer (CRC) cells (PubMed:<a href="http://www.uniprot.org/citations/24623306" target=" blank">24623306</a>). Binds to the USP28 promoter in colorectal cancer (CRC) cells (PubMed:<a

href="http://www.uniprot.org/citations/24623306" target=" blank">24623306</a>).

**Cellular Location** Nucleus.

**Tissue Location** 

Expressed in the developing and adult prostate and prostate cancer cells.

## Phospho-c-Jun (Ser63) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
