

Angiotensin Like 4 Rabbit mAb
Catalog # AP75074**Specification****Angiotensin Like 4 Rabbit mAb - Product Information**

Application	WB
Primary Accession	Q9BY76
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	45214

Angiotensin Like 4 Rabbit mAb - Additional Information

Gene ID 51129

Other Names
ANGPTL4**Dilution**
WB~~1/500-1/1000**Format**
Liquid**Angiotensin Like 4 Rabbit mAb - Protein Information****Name** ANGPTL4**Synonyms** ARP4, HFARP, PGAR {ECO:0000303|PubMed:10**Function**

Mediates inactivation of the lipoprotein lipase LPL, and thereby plays a role in the regulation of triglyceride clearance from the blood serum and in lipid metabolism (PubMed:[19270337](http://www.uniprot.org/citations/19270337)), PubMed:[21398697](http://www.uniprot.org/citations/21398697)), PubMed:[27929370](http://www.uniprot.org/citations/27929370)), PubMed:[29899144](http://www.uniprot.org/citations/29899144)). May also play a role in regulating glucose homeostasis and insulin sensitivity (Probable). Inhibits proliferation, migration, and tubule formation of endothelial cells and reduces vascular leakage (PubMed:[14583458](http://www.uniprot.org/citations/14583458)), PubMed:[17068295](http://www.uniprot.org/citations/17068295)). Upon heterologous expression, inhibits the adhesion of endothelial cell to the extracellular matrix (ECM), and inhibits the reorganization of the actin cytoskeleton, formation of actin stress fibers and focal adhesions in endothelial cells that have adhered to ANGPTL4-containing ECM (in vitro) (PubMed:[17068295](http://www.uniprot.org/citations/17068295)). Depending on context, may modulate tumor-related angiogenesis (By similarity).

Cellular Location

Secreted. Secreted, extracellular space, extracellular matrix. Note=The unprocessed form interacts with the extracellular matrix (PubMed:17068295, PubMed:21398697). This may constitute a dynamic reservoir, a regulatory mechanism of the bioavailability of ANGPTL4 (Probable).

Tissue Location

Detected in blood plasma (at protein level) (PubMed:29899519). Detected in liver (PubMed:10698685). Detected in white fat tissue and placenta (PubMed:10866690). Expressed at high levels in the placenta, heart, liver, muscle, pancreas and lung but expressed poorly in the brain and kidney.

Angiopoietin Like 4 Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
