

Creatine Kinase B type Rabbit mAb

Catalog # AP75289

Specification

Creatine Kinase B type Rabbit mAb - Product Information

Application Primary Accession Reactivity Host

Clonality
Calculated MW

WB, IHC P12277

Human, Mouse, Rat

Rabbit

Monoclonal Antibody

42644

Creatine Kinase B type Rabbit mAb - Additional Information

Gene ID 1152

Other Names

CKB

Dilution

WB~~1/500-1/1000 IHC~~1/50-1/100

Format

Liquid

Creatine Kinase B type Rabbit mAb - Protein Information

Name CKB (HGNC:1991)

Synonyms CKBB

Function

Reversibly catalyzes the transfer of phosphate between ATP and various phosphogens (e.g. creatine phosphate) (PubMed:8186255). Creatine kinase isoenzymes play a central role in energy transduction in tissues with large, fluctuating energy demands, such as skeletal muscle, heart, brain and spermatozoa (Probable). Acts as a key regulator of adaptive thermogenesis as part of the futile creatine cycle: localizes to the mitochondria of thermogenic fat cells and acts by mediating phosphorylation of creatine to initiate a futile cycle of creatine phosphorylation and dephosphorylation (By similarity). During the futile creatine cycle, creatine and N-phosphocreatine are in a futile cycle, which dissipates the high energy charge of N- phosphocreatine as heat without performing any mechanical or chemical work (By similarity).

Cellular Location

Cytoplasm, cytosol {ECO:0000250|UniProtKB:Q04447}. Mitochondrion {ECO:0000250|UniProtKB:Q04447}. Cell membrane. Note=Localizes to the mitochondria of thermogenic fat cells via the internal MTS-like signal (iMTS-L) region

{ECO:0000250|UniProtKB:Q04447}

Creatine Kinase B type Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
