

### **VPS4A Rabbit mAb**

**Catalog # AP76255** 

## **Specification**

### **VPS4A Rabbit mAb - Product Information**

Application
Primary Accession
Reactivity
Host
Clonality
Calculated MW

WB, IHC, IF
O9UN37
Human, Mouse, Rat
Rabbit
Monoclonal Antibody
48898

### VPS4A Rabbit mAb - Additional Information

Gene ID 27183

Other Names VPS4A

**Dilution**WB~~1/500-1/1000
IHC~~1/50-1/100
IF~~1/50-1/200

Format Liquid

## VPS4A Rabbit mAb - Protein Information

Name VPS4A {ECO:0000312|EMBL:AAG01470.1}

### **Function**

Involved in late steps of the endosomal multivesicular bodies (MVB) pathway. Recognizes membrane-associated ESCRT-III assemblies and catalyzes their disassembly, possibly in combination with membrane fission. Redistributes the ESCRT-III components to the cytoplasm for further rounds of MVB sorting. MVBs contain intraluminal vesicles (ILVs) that are generated by invagination and scission from the limiting membrane of the endosome and mostly are delivered to lysosomes enabling degradation of membrane proteins, such as stimulated growth factor receptors, lysosomal enzymes and lipids. It is required for proper accomplishment of various processes including the regulation of endosome size, primary cilium organization, mitotic spindle organization, chromosome segregation, and nuclear envelope sealing and spindle disassembly during anaphase (PubMed:<a href="http://www.uniprot.org/citations/33186545" target=" blank">33186545</a>). Involved in cytokinesis: retained at the midbody by ZFYVE19/ANCHR and CHMP4C until abscission checkpoint signaling is terminated at late cytokinesis. It is then released following dephosphorylation of CHMP4C, leading to abscission (PubMed:<a href="http://www.uniprot.org/citations/24814515" target=" blank">24814515</a>). VPS4A/B are required for the exosomal release of SDCBP, CD63 and syndecan (PubMed:<a href="http://www.uniprot.org/citations/22660413" target="\_blank">22660413</a>). Critical for

normal erythroblast cytokinesis and correct erythropoiesis (PubMed:<a href="http://www.uniprot.org/citations/33186543" target=" blank">33186543</a>).

#### **Cellular Location**

Late endosome membrane {ECO:0000250|UniProtKB:Q8VEJ9}; Peripheral membrane protein {ECO:0000250|UniProtKB:Q8VEJ9}. Midbody Cytoplasm, cytoskeleton, spindle Note=Membrane-associated in the prevacuolar endosomal compartment Localizes to the midbody of dividing cells, interaction with ZFYVE19/ANCHR mediates retention at midbody (PubMed:24814515) Localized in two distinct rings on either side of the Flemming body

**Tissue Location** 

Ubiquitously expressed.

### **VPS4A Rabbit mAb - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
