Modulator of T-cell signaling. Can be either a costimulator of T-cell function, or a coinhibitor, depending on the receptor it binds to. Upon binding to CD226, stimulates T-cell proliferation and cytokine production, including that of IL2, IL5, IL10, IL13, and IFNG. Upon interaction with PVRL2, inhibits T-cell proliferation. These interactions are competitive (PubMed:[26755705](http://www.uniprot.org/citations/26755705)). Probable cell adhesion protein (PubMed:[9657005](http://www.uniprot.org/citations/9657005)).
