

**Poliovirus Receptor Rabbit mAb**  
Catalog # AP76663

**Specification**

---

**Poliovirus Receptor Rabbit mAb - Product Information**

Application	WB
Primary Accession	<a href="#">P15151</a>
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	45303

**Poliovirus Receptor Rabbit mAb - Additional Information**

**Gene ID** 5817

**Other Names**  
PVR

**Dilution**  
WB~~1/500-1/1000

**Format**  
Liquid

**Poliovirus Receptor Rabbit mAb - Protein Information**

**Name** PVR

**Synonyms** PVS

**Function**  
Mediates NK cell adhesion and triggers NK cell effector functions. Binds two different NK cell receptors: CD96 and CD226. These interactions accumulates at the cell-cell contact site, leading to the formation of a mature immunological synapse between NK cell and target cell. This may trigger adhesion and secretion of lytic granules and IFN-gamma and activate cytotoxicity of activated NK cells. May also promote NK cell-target cell modular exchange, and PVR transfer to the NK cell. This transfer is more important in some tumor cells expressing a lot of PVR, and may trigger fratricide NK cell activation, providing tumors with a mechanism of immunoevasion. Plays a role in mediating tumor cell invasion and migration.

**Cellular Location**  
[Isoform Alpha]: Cell membrane; Single-pass type I membrane protein [Isoform Beta]: Secreted.

**Poliovirus Receptor Rabbit mAb - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
