

Poliovirus Receptor Rabbit mAb
Catalog # AP76663

Specification

Poliovirus Receptor Rabbit mAb - Product Information

Application	WB
Primary Accession	P15151
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	45303

Poliovirus Receptor Rabbit mAb - Additional Information

Gene ID 5817

Other Names
PVR

Dilution
WB~~1/500-1/1000

Format
Liquid

Poliovirus Receptor Rabbit mAb - Protein Information

Name PVR

Synonyms PVS

Function

Mediates NK cell adhesion and triggers NK cell effector functions. Binds two different NK cell receptors: CD96 and CD226. These interactions accumulates at the cell-cell contact site, leading to the formation of a mature immunological synapse between NK cell and target cell. This may trigger adhesion and secretion of lytic granules and IFN-gamma and activate cytotoxicity of activated NK cells. May also promote NK cell-target cell modular exchange, and PVR transfer to the NK cell. This transfer is more important in some tumor cells expressing a lot of PVR, and may trigger fratricide NK cell activation, providing tumors with a mechanism of immunoevasion. Plays a role in mediating tumor cell invasion and migration.

Cellular Location

[Isoform Alpha]: Cell membrane; Single-pass type I membrane protein [Isoform Beta]: Secreted.

Poliovirus Receptor Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
