

RhoGDI Rabbit mAb
Catalog # AP76694

Specification

RhoGDI Rabbit mAb - Product Information

Application	WB, IF
Primary Accession	P52565
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	23207

RhoGDI Rabbit mAb - Additional Information

Gene ID 396

Other Names
ARHGDI A

Dilution
WB~~1/500-1/1000
IF~~1/50-1/200

Format
Liquid

RhoGDI Rabbit mAb - Protein Information

Name ARHGDI A

Synonyms GDIA1

Function

Controls Rho proteins homeostasis. Regulates the GDP/GTP exchange reaction of the Rho proteins by inhibiting the dissociation of GDP from them, and the subsequent binding of GTP to them. Retains Rho proteins such as CDC42, RAC1 and RHOA in an inactive cytosolic pool, regulating their stability and protecting them from degradation. Actively involved in the recycling and distribution of activated Rho GTPases in the cell, mediates extraction from membranes of both inactive and activated molecules due its exceptionally high affinity for prenylated forms. Through the modulation of Rho proteins, may play a role in cell motility regulation. In glioma cells, inhibits cell migration and invasion by mediating the signals of SEMA5A and PLXNB3 that lead to inactivation of RAC1.

Cellular Location
Cytoplasm.

RhoGDI Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
