Dynein Light Chain Tctex Type 1 Rabbit mAb - Protein Information

Name DYNLT1

Synonyms TCTEL1, TCTEX-1, TCTEX1

Function

Acts as one of several non-catalytic accessory components of the cytoplasmic dynein 1 complex that are thought to be involved in linking dynein to cargos and to adapter proteins that regulate dynein function. Cytoplasmic dynein 1 acts as a motor for the intracellular retrograde motility of vesicles and organelles along microtubules. Binds to transport cargos and is involved in apical cargo transport such as rhodopsin-bearing vesicles in polarized epithelia. May also be a accessory component of axonemal dynein. (Microbial infection) Is involved in intracellular targeting of D-type retrovirus gag polyproteins to the cytoplasmic assembly site.

Cellular Location

Golgi apparatus. Cytoplasm. Cytoplasm, cytoskeleton, spindle Note=Localizes to mitotic spindles.

Tissue Location

Expressed in heart, placenta, skeletal muscle kidney, pancreas, spleen, prostate, testis, ovary,

ileum and colon Expressed in lung endothelial and smooth muscle cells (at protein level).
