

GATA6 Rabbit mAb
Catalog # AP77759**Specification**

GATA6 Rabbit mAb - Product Information

Application	WB
Primary Accession	O92908
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	60033

GATA6 Rabbit mAb - Additional Information**Gene ID** 2627**Other Names**

GATA6

Dilution

WB~~1/500-1/1000

Format

Liquid

GATA6 Rabbit mAb - Protein Information**Name** GATA6**Function**

Transcriptional activator (PubMed: [19666519](http://www.uniprot.org/citations/19666519)), PubMed: [22750565](http://www.uniprot.org/citations/22750565), PubMed: [22824924](http://www.uniprot.org/citations/22824924), PubMed: [27756709](http://www.uniprot.org/citations/27756709)). Regulates SEMA3C and PLXNA2 (PubMed: [19666519](http://www.uniprot.org/citations/19666519)). Involved in gene regulation specifically in the gastric epithelium (PubMed: [9315713](http://www.uniprot.org/citations/9315713)). May regulate genes that protect epithelial cells from bacterial infection (PubMed: [16968778](http://www.uniprot.org/citations/16968778)). Involved in bone morphogenetic protein (BMP)-mediated cardiac-specific gene expression (By similarity). Binds to BMP response element (BMPRE) DNA sequences within cardiac activating regions (By similarity). In human skin, controls several physiological processes contributing to homeostasis of the upper pilosebaceous unit. Triggers ductal and sebaceous differentiation as well as limits cell proliferation and lipid production to prevent hyperseborrhoea. Mediates the effects of retinoic acid on sebocyte proliferation, differentiation and lipid production. Also contributes to immune regulation of sebocytes and antimicrobial responses by modulating the expression of anti-inflammatory genes such as IL10 and pro-inflammatory genes such as IL6, TLR2, TLR4, and IFNG.

Activates TGF β 1 signaling which controls the interfollicular epidermis fate (PubMed:33082341).

Cellular Location

Nucleus

Tissue Location

Expressed in heart, gut and gut-derived tissues. Expressed in skin upper pilosebaceous unit. Expression is decreased or lost in acne lesions (PubMed:33082341).

GATA6 Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
