**LI Cadherin Rabbit mAb - Protein Information**

**Name** CDH17

**Function**  
Cadherins are calcium-dependent cell adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types. LI-cadherin may have a role in the morphological organization of liver and intestine. Involved in intestinal peptide transport.

**Cellular Location**  
Cell membrane; Single-pass type I membrane protein

**Tissue Location**  
Expressed in the gastrointestinal tract and pancreatic duct. Not detected in kidney, lung, liver, brain, adrenal gland and skin.
