

Inhibin beta A Rabbit mAb

Catalog # AP78398

Specification

Inhibin beta A Rabbit mAb - Product Information

Application WB **Primary Accession** P08476

Reactivity Human, Mouse, Rat Host Rabbit

Clonality

Monoclonal Antibody Calculated MW 47442

Inhibin beta A Rabbit mAb - Additional Information

Gene ID 3624

Other Names INHBA

Dilution

WB~~1/500-1/1000

Format Liquid

Inhibin beta A Rabbit mAb - Protein Information

Name INHBA

Function

Inhibins and activins inhibit and activate, respectively, the secretion of follitropin by the pituitary gland. Inhibins/activins are involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development or bone growth, depending on their subunit composition. Inhibins appear to oppose the functions of activins.

Cellular Location Secreted.

Inhibin beta A Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides

Tel: 858.875.1900 Fax: 858.875.1999

- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
