

GMFG Antibody (N-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7871a

Specification

GMFG Antibody (N-term) - Product Information

Application	WB, IHC-P,E
Primary Accession	O60234
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	1-30

GMFG Antibody (N-term) - Additional Information

Gene ID 9535

Other Names

Glia maturation factor gamma, GMF-gamma, GMFG

Target/Specificity

This GMFG antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human GMFG.

Dilution

WB~~1:1000
IHC-P~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

GMFG Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

GMFG Antibody (N-term) - Protein Information

Name GMFG

Tissue Location

Expressed predominantly in lung, heart and placenta

GMFG Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GMFG Antibody (N-term) - Images

Western blot analysis of GMFG Antibody (N-term) (Cat. #AP7871a) in Jurkat cell line lysates (35ug/lane). GMFG (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human lung carcinoma tissue reacted with GMFG antibody (N-term) (Cat.#AP7871a), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

GMFG Antibody (N-term) - Background

Glia maturation factor gamma (GMFG) is a cytokine-responsive protein in erythropoietin-induced and granulocyte-colony stimulating factor-induced hematopoietic lineage development. It may be

involved in glial differentiation, neural regeneration, and inhibition of tumor cell proliferation.
