

**FSH beta Rabbit mAb**  
Catalog # AP78720**Specification**

---

**FSH beta Rabbit mAb - Product Information**

|                   |                            |
|-------------------|----------------------------|
| Application       | <b>WB</b>                  |
| Primary Accession | <a href="#">P01225</a>     |
| Reactivity        | <b>Human</b>               |
| Host              | <b>Rabbit</b>              |
| Clonality         | <b>Monoclonal Antibody</b> |
| Calculated MW     | <b>14700</b>               |

**FSH beta Rabbit mAb - Additional Information****Gene ID** 2488**Other Names**

FSHB

**Dilution**

WB~~1/500-1/1000

**Format**

Liquid

**FSH beta Rabbit mAb - Protein Information****Name** FSHB**Function**

Together with the alpha chain CGA constitutes follitropin, the follicle-stimulating hormone, and provides its biological specificity to the hormone heterodimer. Binds FSHR, a G protein-coupled receptor, on target cells to activate downstream signaling pathways (PubMed:<a href="http://www.uniprot.org/citations/24692546" target="\_blank">24692546</a>, PubMed:<a href="http://www.uniprot.org/citations/2494176" target="\_blank">2494176</a>). Follitropin is involved in follicle development and spermatogenesis in reproductive organs (PubMed:<a href="http://www.uniprot.org/citations/407105" target="\_blank">407105</a>, PubMed:<a href="http://www.uniprot.org/citations/8220432" target="\_blank">8220432</a>).

**Cellular Location**

Secreted. Note=Efficient secretion requires dimerization with CGA

**FSH beta Rabbit mAb - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
