

## Phospho-CBL (Ser669) Rabbit mAb

**Catalog # AP78911** 

## **Specification**

## Phospho-CBL (Ser669) Rabbit mAb - Product Information

**Application** WB **Primary Accession** P22681

Reactivity Human, Mouse, Rat Host

Clonality **Monoclonal Antibody** 

Calculated MW 99633

## Phospho-CBL (Ser669) Rabbit mAb - Additional Information

Gene ID 867

**Other Names** 

**CBL** 

Dilution

WB~~1/500-1/1000

**Format** 

Liquid

#### Phospho-CBL (Ser669) Rabbit mAb - Protein Information

**Name CBL** 

Synonyms CBL2, RNF55

#### **Function**

E3 ubiquitin-protein ligase that acts as a negative regulator of many signaling pathways by mediating ubiquitination of cell surface receptors (PubMed:<a

href="http://www.uniprot.org/citations/10514377" target=" blank">10514377</a>, PubMed:<a href="http://www.uniprot.org/citations/11896602" target="blank">11896602</a>, PubMed:<a href="http://www.uniprot.org/citations/14661060" target="\_blank">14661060</a>, PubMed:<a href="http://www.uniprot.org/citations/14739300" target="blank">14739300</a>, PubMed:<a href="http://www.uniprot.org/citations/15190072" target="\_blank">15190072</a>, PubMed:<a href="http://www.uniprot.org/citations/17509076" target="\_blank">17509076</a>, PubMed:<a href="http://www.uniprot.org/citations/18374639" target="blank">18374639</a>, PubMed:<a

href="http://www.uniprot.org/citations/19689429" target="blank">19689429</a>, PubMed:<a

href="http://www.uniprot.org/citations/21596750" target=" blank">21596750</a>, PubMed:<a

href="http://www.uniprot.org/citations/28381567" target="blank">28381567</a>). Accepts ubiquitin from specific E2 ubiquitin-conjugating enzymes, and then transfers it to substrates promoting their degradation by the proteasome (PubMed:<a

href="http://www.uniprot.org/citations/10514377" target="\_blank">10514377</a>, PubMed:<a href="http://www.uniprot.org/citations/14661060" target="\_blank">14661060</a>, PubMed:<a

href="http://www.uniprot.org/citations/14739300" target=" blank">14739300</a>, PubMed:<a href="http://www.uniprot.org/citations/17094949" target="\_blank">17094949</a>, PubMed:<a href="http://www.uniprot.org/citations/17509076" target="\_blank">17509076</a>, PubMed:<a href="http://www.uniprot.org/citations/17974561" target="\_blank">17509076</a>, PubMed:<a href="http://www.uniprot.org/citations/17974561" target="\_blank">17974561</a>). Recognizes activated receptor tyrosine kinases, including KIT, FLT1, FGFR1, FGFR2, PDGFRA, PDGFRB, CSF1R, EPHA8 and KDR and mediates their ubiquitination to terminate signaling (PubMed: <a href="http://www.uniprot.org/citations/15190072" target=" blank">15190072</a>, PubMed:<a href="http://www.uniprot.org/citations/18374639" target="blank">18374639</a>, PubMed:<a href="http://www.uniprot.org/citations/21596750" target="blank">21596750</a>). Recognizes membrane-bound HCK, SRC and other kinases of the SRC family and mediates their ubiquitination and degradation (PubMed: <a href="http://www.uniprot.org/citations/11896602" target=" blank">11896602</a>). Ubiquitinates EGFR and SPRY2 (PubMed:<a href="http://www.uniprot.org/citations/17094949" target=" blank">17094949</a>, PubMed:<a href="http://www.uniprot.org/citations/17974561" target="blank">17974561</a>). Ubiquitinates NECTIN1 following association between NECTIN1 and herpes simplex virus 1/HHV-1 envelope glycoprotein D, leading to NECTIN1 removal from cell surface (PubMed:<a href="http://www.uniprot.org/citations/28381567" target=" blank">28381567</a>). Participates in signal transduction in hematopoietic cells. Plays an important role in the regulation of osteoblast differentiation and apoptosis (PubMed: <a href="http://www.uniprot.org/citations/15190072" target=" blank">15190072</a>, PubMed:<a href="http://www.uniprot.org/citations/18374639" target="blank">18374639</a>). Essential for osteoclastic bone resorption (PubMed:<a href="http://www.uniprot.org/citations/14739300" target=" blank">14739300</a>). The 'Tyr-731' phosphorylated form induces the activation and recruitment of phosphatidylinositol 3-kinase to the cell membrane in a signaling pathway that is critical for osteoclast function (PubMed: <a href="http://www.uniprot.org/citations/14739300" target=" blank">14739300</a>). May be functionally coupled with the E2 ubiquitin-protein ligase UB2D3. In association with CBLB, required for proper feedback inhibition of ciliary platelet-derived growth factor receptor-alpha (PDGFRA) signaling pathway via ubiquitination and internalization of PDGFRA (By similarity).

### **Cellular Location**

Cytoplasm. Cell membrane. Cell projection, cilium. Golgi apparatus. Note=Colocalizes with FGFR2 in lipid rafts at the cell membrane

### Phospho-CBL (Ser669) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
