

Phospho-Nucleolin (Thr76) Rabbit mAb
Catalog # AP78915**Specification**

Phospho-Nucleolin (Thr76) Rabbit mAb - Product Information

Application	WB
Primary Accession	P19338
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	76614

Phospho-Nucleolin (Thr76) Rabbit mAb - Additional Information**Gene ID** 4691**Other Names**

NCL

Dilution

WB~~1/500-1/1000

Format

Liquid

Phospho-Nucleolin (Thr76) Rabbit mAb - Protein Information**Name** NCL**Function**

Nucleolin is the major nucleolar protein of growing eukaryotic cells. It is found associated with intranucleolar chromatin and pre-ribosomal particles. It induces chromatin decondensation by binding to histone H1. It is thought to play a role in pre-rRNA transcription and ribosome assembly. May play a role in the process of transcriptional elongation. Binds RNA oligonucleotides with 5'-UUAGGG- 3' repeats more tightly than the telomeric single-stranded DNA 5'- TTAGGG-3' repeats.

Cellular Location

Nucleus, nucleolus. Cytoplasm. Note=Localized in cytoplasmic mRNP granules containing untranslated mRNAs

Phospho-Nucleolin (Thr76) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)

- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
