

**RPS8 Antibody (N-term)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP8831a**

**Specification**

---

**RPS8 Antibody (N-term) - Product Information**

Application	WB, FC,E
Primary Accession	<a href="#">P62241</a>
Other Accession	<a href="#">O7SYU0</a> , <a href="#">P62243</a> , <a href="#">P62242</a> , <a href="#">O4R6P8</a> , <a href="#">O5E958</a> , <a href="#">NP_001003</a> , <a href="#">G1TJW1</a>
Reactivity	Human, Mouse
Predicted	Bovine, Monkey, Rabbit, Rat, Xenopus
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	1-28

**RPS8 Antibody (N-term) - Additional Information**

**Gene ID** 6202

**Other Names**

40S ribosomal protein S8, RPS8

**Target/Specificity**

This RPS8 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-28 amino acids from the N-terminal region of human RPS8.

**Dilution**

WB~~1:1000  
FC~~1:10~50

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

RPS8 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**RPS8 Antibody (N-term) - Protein Information**

**Name** RPS8 ([HGNC:10441](#))

**Function** Component of the small ribosomal subunit (PubMed:[23636399](#)). The ribosome is a large ribonucleoprotein complex responsible for the synthesis of proteins in the cell (PubMed:[23636399](#)). Part of the small subunit (SSU) processome, first precursor of the small eukaryotic ribosomal subunit. During the assembly of the SSU processome in the nucleolus, many ribosome biogenesis factors, an RNA chaperone and ribosomal proteins associate with the nascent pre-rRNA and work in concert to generate RNA folding, modifications, rearrangements and cleavage as well as targeted degradation of pre-ribosomal RNA by the RNA exosome (PubMed:[34516797](#)).

#### **Cellular Location**

Cytoplasm. Membrane; Lipid-anchor. Nucleus, nucleolus. Note=Localized in cytoplasmic mRNP granules containing untranslated mRNAs.

#### **RPS8 Antibody (N-term) - Protocols**

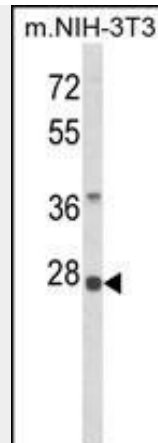

Provided below are standard protocols that you may find useful for product applications.

#### **RPS8 Antibody (N-term) - Images**

Western blot analysis of RPS8 Antibody (N-term) (Cat. #AP8831a) in HL-60 cell line lysates (35ug/lane). RPS8 (arrow) was detected using the purified Pab.

Western blot analysis of RPS8 Antibody (N-term) (Cat. #AP8831a) in NIH-3T3 cell line lysates (35ug/lane). RPS8 (arrow) was detected using the purified Pab

RPS8 Antibody (N-term) (Cat. #AP8831a) flow cytometric analysis of HL-60 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

### RPS8 Antibody (N-term) - Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. RPS8 is a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S8E family of ribosomal proteins. It is located in the cytoplasm.
