

## **Desmin Antibody**

Rabbit mAb Catalog # AP90265

#### **Specification**

## **Desmin Antibody - Product Information**

Application WB, IHC, FC, ICC

Primary Accession P17661
Reactivity Rat

Clonality Monoclonal

**Other Names** 

CMD11; CSM1; CSM2; DES; DESM; Desmin; intermediate filament protein

Isotype Rabbit IgG
Host Rabbit
Calculated MW 53536 Da

# **Desmin Antibody - Additional Information**

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

**Desmin** 

Description

Desmin a class-III intermediate filaments found in muscle cells. In adult striated

muscle they form a fibrous network connecting myofibrils to each other and to the plasma membrane from the periphery of the Z-line structures. Mutations in this gene are associated with desmin-related

myopathy (CSM), and with distal

myopathies.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

myopathy, a familial cardiac and skeletal

freeze / thaw cycle.

#### **Desmin Antibody - Protein Information**

#### Name DES

#### **Function**

Muscle-specific type III intermediate filament essential for proper muscular structure and function. Plays a crucial role in maintaining the structure of sarcomeres, inter-connecting the Z-disks and forming the myofibrils, linking them not only to the sarcolemmal cytoskeleton, but also to the nucleus and mitochondria, thus providing strength for the muscle fiber during activity (PubMed:<a href="http://www.uniprot.org/citations/25358400" target="\_blank">25358400</a>). In adult striated muscle they form a fibrous network connecting myofibrils to each other and to the plasma

membrane from the periphery of the Z- line structures (PubMed:<a

href="http://www.uniprot.org/citations/24200904" target="\_blank">24200904</a>, PubMed:<a href="http://www.uniprot.org/citations/25394388" target="\_blank">25394388</a>, PubMed:<a href="http://www.uniprot.org/citations/26724190" target="\_blank">26724190</a>). May act as a sarcomeric microtubule-anchoring protein: specifically associates with detyrosinated tubulin-alpha chains, leading to buckled microtubules and mechanical resistance to contraction. Required for nuclear membrane integrity, via anchoring at the cell tip and nuclear envelope, resulting in maintenance of microtubule-derived intracellular mechanical forces (By similarity). Contributes to the transcriptional regulation of the NKX2-5 gene in cardiac progenitor cells during a short period of cardiomyogenesis and in cardiac side population stem cells in the adult. Plays a role in maintaining an optimal conformation of nebulette (NEB) on heart muscle sarcomeres to bind and recruit cardiac alpha-actin (By similarity).

#### **Cellular Location**

Cytoplasm, myofibril, sarcomere, Z line. Cytoplasm Cell membrane, sarcolemma. Nucleus {ECO:0000250|UniProtKB:P31001}. Cell tip {ECO:0000250|UniProtKB:P31001}. Nucleus envelope {ECO:0000250|UniProtKB:P31001}. Note=Localizes in the intercalated disks which occur at the Z line of cardiomyocytes (PubMed:24200904, PubMed:26724190). Localizes in the nucleus exclusively in differentiating cardiac progenitor cells and premature cardiomyocytes (By similarity). PKP2 is required for correct anchoring of DES at the cell tip and nuclear envelope (By similarity) {ECO:0000250|UniProtKB:P31001, ECO:0000269|PubMed:24200904, ECO:0000269|PubMed:26724190}

## **Desmin Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

**Desmin Antibody - Images**
