

PRMT5 Antibody

Rabbit mAb Catalog # AP90458

Specification

PRMT5 Antibody - Product Information

Application WB, IHC, FC, ICC

Primary Accession O14744
Reactivity Rat

Clonality Monoclonal

Other Names

HRMT1L5; IBP72; JBP1; SKB1; SKB1Hs; PRMT5; Skb1Hs Methyltransferase;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 72684 Da

PRMT5 Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

PRMT5

Description Involved in regulation of cell cycle progression through G2 by negatively

regulating Swe1p, a protein tyrosine kinase that phosphorylates and inhibits Cdc28p. An HsI7p homologue, Skb1, was identified in fission yeast by virtue of its yeast two-hybrid interaction with Shk1p, a p21 (cdc42p/Rac) activated kinase (PAK). Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide

and 50% glycerol. Store at $+4^{\circ}\text{C}$ short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

PRMT5 Antibody - Protein Information

Storage Condition and Buffer

Name PRMT5

Synonyms HRMT1L5, IBP72, JBP1, SKB1

Function

Arginine methyltransferase that can both catalyze the formation of omega-N monomethylarginine (MMA) and symmetrical dimethylarginine (sDMA), with a preference for the formation of MMA (PubMed:10531356, PubMed:11152681, PubMed:11747828, PubMed:12411503,

```

PubMed:<a href="http://www.uniprot.org/citations/17709427" target="blank">17709427</a>,
PubMed:<a href="http://www.uniprot.org/citations/20159986" target="_blank">20159986</a>,
PubMed:<a href="http://www.uniprot.org/citations/20810653" target="_blank">20810653</a>,
PubMed: <a href="http://www.uniprot.org/citations/21081503" target="blank">21081503</a>,
PubMed: <a href="http://www.uniprot.org/citations/21258366" target=" blank">21258366</a>,
PubMed:<a href="http://www.uniprot.org/citations/21917714" target="blank">21917714</a>,
PubMed:<a href="http://www.uniprot.org/citations/22269951" target="blank">22269951</a>).
Specifically mediates the symmetrical dimethylation of arginine residues in the small nuclear
ribonucleoproteins Sm D1 (SNRPD1) and Sm D3 (SNRPD3); such methylation being required for the
assembly and biogenesis of snRNP core particles (PubMed: <a
href="http://www.uniprot.org/citations/11747828" target=" blank">11747828</a>, PubMed:<a
href="http://www.uniprot.org/citations/12411503" target=" blank">12411503</a>, PubMed:<a
href="http://www.uniprot.org/citations/17709427" target="blank">17709427</a>). Methylates
SUPT5H and may regulate its transcriptional elongation properties (PubMed:<a
href="http://www.uniprot.org/citations/12718890" target=" blank">12718890</a>). May
methylate the N-terminal region of MBD2 (PubMed:<a
href="http://www.uniprot.org/citations/16428440" target=" blank">16428440</a>). Mono- and
dimethylates arginine residues of myelin basic protein (MBP) in vitro. May play a role in
cytokine-activated transduction pathways. Negatively regulates cyclin E1 promoter activity and
cellular proliferation. Methylates histone H2A and H4 'Arg-3' during germ cell development (By
similarity). Methylates histone H3 'Arg-8', which may repress transcription (By similarity).
Methylates the Piwi proteins (PIWIL1, PIWIL2 and PIWIL4), methylation of Piwi proteins being
required for the interaction with Tudor domain-containing proteins and subsequent localization to
the meiotic nuage (By similarity). Methylates RPS10. Attenuates EGF signaling through the
MAPK1/MAPK3 pathway acting at 2 levels. First, monomethylates EGFR; this enhances EGFR
'Tyr-1197' phosphorylation and PTPN6 recruitment, eventually leading to reduced SOS1
phosphorylation (PubMed: <a href="http://www.uniprot.org/citations/21258366"
target=" blank">21258366</a>, PubMed:<a href="http://www.uniprot.org/citations/21917714"
target="blank">21917714</a>). Second, methylates RAF1 and probably BRAF, hence
destabilizing these 2 signaling proteins and reducing their catalytic activity (PubMed: <a
href="http://www.uniprot.org/citations/21917714" target=" blank">21917714</a>). Required for
induction of E-selectin and VCAM-1, on the endothelial cells surface at sites of inflammation.
Methylates HOXA9 (PubMed:<a href="http://www.uniprot.org/citations/22269951"
target=" blank">22269951</a>). Methylates and regulates SRGAP2 which is involved in cell
migration and differentiation (PubMed: <a href="http://www.uniprot.org/citations/20810653"
target=" blank">20810653</a>). Acts as a transcriptional corepressor in CRY1-mediated
repression of the core circadian component PER1 by regulating the H4R3 dimethylation at the
PER1 promoter (By similarity). Methylates GM130/GOLGA2, regulating Golgi ribbon formation
(PubMed:<a href="http://www.uniprot.org/citations/20421892" target="_blank">20421892</a>).
Methylates H4R3 in genes involved in glioblastomagenesis in a CHTOP- and/or TET1-dependent
manner (PubMed: <a href="http://www.uniprot.org/citations/25284789"
target=" blank">25284789</a>). Symmetrically methylates POLR2A, a modification that allows
the recruitment to POLR2A of proteins including SMN1/SMN2 and SETX. This is required for
resolving RNA-DNA hybrids created by RNA polymerase II, that form R-loop in transcription
terminal regions, an important step in proper transcription termination (PubMed: <a
href="http://www.uniprot.org/citations/26700805" target=" blank">26700805</a>). Along with
LYAR, binds the promoter of gamma-globin HBG1/HBG2 and represses its expression (PubMed: <a
href="http://www.uniprot.org/citations/25092918" target="blank">25092918</a>).
Symmetrically methylates NCL (PubMed: <a href="http://www.uniprot.org/citations/21081503"
target=" blank">21081503</a>). Methylates p53/TP53; methylation might possibly affect
p53/TP53 target gene specificity (PubMed:<a href="http://www.uniprot.org/citations/19011621"
target=" blank">19011621</a>). Involved in spliceosome maturation and mRNA splicing in
prophase I spermatocytes through the catalysis of the symmetrical arginine dimethylation of
SNRPB (small nuclear ribonucleoprotein- associated protein) and the interaction with tudor
domain-containing protein TDRD6 (By similarity).
```

Cellular Location

Cytoplasm. Nucleus. Chromosome. Golgi apparatus. Note=Localizes to promoter regions of target genes on chromosomes (PubMed:33376131). Localizes to methylated chromatin (PubMed:16428440).

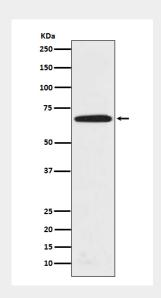

Tissue Location Ubiquitous..

PRMT5 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

PRMT5 Antibody - Images

Western blot analysis of PRMT5 expression in HeLa cell lysate.
