

ASH2L Antibody
Rabbit mAb
Catalog # AP90529

Specification

ASH2L Antibody - Product Information

Application	WB, IHC, ICC
Primary Accession	O9UBL3
Reactivity	Rat
Clonality	Monoclonal
Other Names	
ASH 2; ASH2; ASH2 LIKE; ASH2 like protein; ASH2-like protein; Ash2l; ASH2L1; ASH2L2; Bre 2; Bre2;	
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	68723 Da

ASH2L Antibody - Additional Information

Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human ASH2L
Description	Component of the Set1/Ash2 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3, but not if the neighboring 'Lys-9' residue is already methylated. As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3. May function as a transcriptional regulator. May play a role in hematopoiesis.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

ASH2L Antibody - Protein Information

Name ASH2L

Synonyms ASH2L1

Function

Transcriptional regulator (PubMed: <http://www.uniprot.org/citations/12670868> target="_blank">12670868). Component or associated component of some histone methyltransferase complexes which regulates transcription through recruitment of those

complexes to gene promoters (PubMed:19131338). Component of the Set1/Ash2 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3, but not if the neighboring 'Lys-9' residue is already methylated (PubMed:19556245). As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3 (PubMed:19556245). May play a role in hematopoiesis (PubMed:12670868). In association with RBBP5 and WDR5, stimulates the histone methyltransferase activities of KMT2A, KMT2B, KMT2C, KMT2D, SETD1A and SETD1B (PubMed:21220120, PubMed:22266653).

Cellular Location

Nucleus.

Tissue Location

Ubiquitously expressed. Predominantly expressed in adult heart and testis and fetal lung and liver, with barely detectable expression in adult lung, liver, kidney, prostate, and peripheral leukocytes.

ASH2L Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
