

## **PGK1** Antibody

Rabbit mAb Catalog # AP90539

### **Specification**

#### **PGK1** Antibody - Product Information

Application WB, FC, ICC
Primary Accession P00558
Reactivity Rat
Clonality Monoclonal

**Other Names** 

MGC117307; MGC142128; MGC8947; MIG10; PGKA; PGK1; PRP2;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 44615 Da

# **PGK1** Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

PGK1

Description The PGK1 gene encodes phosphoglycerate

kinase-1, also known as ATP:3-phosphoglycerate

1-phosphotransferase (EC 2.7.2.3), which catalyzes the reversible conversion of

1,3-diphosphoglycerate to

3-phosphoglycerate during glycolysis, generating one molecule of ATP. It Belongs to the phosphoglycerate kinase family and

defects in PGK1 are the cause of phosphoglycerate kinase 1 deficiency

(PGK1D).

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline ,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

### **PGK1** Antibody - Protein Information

Name PGK1

**Synonyms PGKA** 

### **Function**

Catalyzes one of the two ATP producing reactions in the glycolytic pathway via the reversible conversion of 1,3- diphosphoglycerate to 3-phosphoglycerate (PubMed:<a

Tel: 858.875.1900 Fax: 858.875.1999

href="http://www.uniprot.org/citations/30323285" target=" blank">30323285</a>, PubMed:<a href="http://www.uniprot.org/citations/7391028" target=" blank">7391028</a>). Both L- and Dforms of purine and pyrimidine nucleotides can be used as substrates, but the activity is much lower on pyrimidines (PubMed:<a href="http://www.uniprot.org/citations/18463139" target=" blank">18463139</a>). In addition to its role as a glycolytic enzyme, it seems that PGK1 acts as a polymerase alpha cofactor protein (primer recognition protein) (PubMed: <a href="http://www.uniprot.org/citations/2324090" target=" blank">2324090</a>). Acts as a protein kinase when localized to the mitochondrion where it phosphorylates pyruvate dehydrogenase kinase PDK1 to inhibit pyruvate dehydrogenase complex activity and suppress the formation of acetyl- coenzyme A from pyruvate, and consequently inhibit oxidative phosphorylation and promote glycolysis (PubMed:<a href="http://www.uniprot.org/citations/26942675" target=" blank">26942675</a>, PubMed:<a href="http://www.uniprot.org/citations/36849569" target="blank">36849569</a>). May play a role in sperm motility (PubMed:<a href="http://www.uniprot.org/citations/26677959" target=" blank">26677959</a>).

#### **Cellular Location**

Cytoplasm, cytosol. Mitochondrion matrix. Note=Hypoxic conditions promote mitochondrial targeting (PubMed:26942675). Targeted to the mitochondrion following phosphorylation by MAPK1/ERK2, cis-trans isomerization by PIN1, and binding to mitochondrial circRNA mcPGK1 (PubMed:36849569).

#### **Tissue Location**

Mainly expressed in spermatogonia. Localized on the principle piece in the sperm (at protein level). Expression significantly decreased in the testis of elderly men

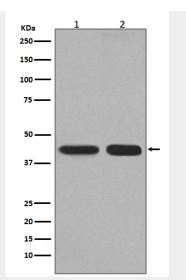

#### **PGK1 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# **PGK1 Antibody - Images**

Western blot analysis of PGK1 expression in (1) HepG2 cell lysate; (2) Mouse kidney lysate.
