

## 14-3-3 sigma Antibody

Rabbit mAb Catalog # AP90856

# **Specification**

## 14-3-3 sigma Antibody - Product Information

Application WB, IHC
Primary Accession P31947
Reactivity Rat

Clonality Monoclonal

**Other Names** 

14 3 3 protein; Epithelial cell marker protein 1; HME 1; Mkrn3; Mme1; SFN protein; Stratifin;

YWHAS;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 27774 Da

## 14-3-3 sigma Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

14-3-3 sigma

Description Adapter protein implicated in the

regulation of a large spectrum of both general and specialized signaling pathways. Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif.

Binding generally results in the modulation of the activity of the binding partner.
When bound to KRT17, regulates protein synthesis and epithelial cell growth by

stimulating Akt/mTOR pathway.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline ,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

# 14-3-3 sigma Antibody - Protein Information

**Name SFN** 

Synonyms HME1 {ECO:0000303|PubMed:1390337}

#### **Function**

Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathways (PubMed:<a href="http://www.uniprot.org/citations/15731107"">http://www.uniprot.org/citations/15731107</a>"

target="\_blank">15731107</a>, PubMed:<a href="http://www.uniprot.org/citations/22634725" target="blank">22634725</a>, PubMed:<a href="http://www.uniprot.org/citations/28202711" target="blank">28202711</a>, PubMed:<a href="http://www.uniprot.org/citations/37797010" target=" blank">37797010</a>). Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif (PubMed:<a href="http://www.uniprot.org/citations/15731107" target=" blank">15731107</a>, PubMed:<a href="http://www.uniprot.org/citations/22634725" target=" blank">22634725</a>, PubMed:<a href="http://www.uniprot.org/citations/28202711" target="blank">28202711</a>, PubMed:<a href="http://www.uniprot.org/citations/37797010" target="blank">37797010</a>). Binding generally results in the modulation of the activity of the binding partner (PubMed: <a href="http://www.uniprot.org/citations/15731107" target=" blank">15731107</a>, PubMed:<a href="http://www.uniprot.org/citations/22634725" target="blank">22634725</a>, PubMed:<a href="http://www.uniprot.org/citations/28202711" target=" blank">28202711</a>, PubMed:<a href="http://www.uniprot.org/citations/37797010" target="blank">37797010</a>). Promotes cytosolic retention of GBP1 GTPase by binding to phosphorylated GBP1, thereby inhibiting the innate immune response (PubMed:<a href="http://www.uniprot.org/citations/37797010" target=" blank">37797010</a>). Also acts as a TP53/p53-regulated inhibitor of G2/M progression (PubMed:<a href="http://www.uniprot.org/citations/9659898" target="\_blank">9659898</a>). When bound to KRT17, regulates protein synthesis and epithelial cell growth by stimulating Akt/mTOR pathway (By similarity). Acts to maintain desmosome cell junction adhesion in epithelial cells via interacting with and sequestering PKP3 to the cytoplasm, thereby restricting its translocation to existing desmosome structures and therefore maintaining desmosome protein homeostasis (PubMed:<a href="http://www.uniprot.org/citations/24124604" target=" blank">24124604</a>). Also acts to facilitate PKP3 exchange at desmosome plagues, thereby maintaining keratinocyte intercellular adhesion (PubMed:<a href="http://www.uniprot.org/citations/29678907" target=" blank">29678907</a>). May also regulate MDM2 autoubiquitination and degradation and thereby activate p53/TP53 (PubMed: <a href="http://www.uniprot.org/citations/18382127" target=" blank">18382127</a>).

## **Cellular Location**

Cytoplasm. Nucleus {ECO:0000250|UniProtKB:O70456} Secreted. Note=May be secreted by a non- classical secretory pathway.

#### **Tissue Location**

Present mainly in tissues enriched in stratified squamous keratinizing epithelium.

## 14-3-3 sigma Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
