Calculated MW**Rabbit IgG**
Rabbit
71540 Da**CD42b Antibody - Additional Information**Purification
Immunogen**Affinity-chromatography**
A synthesized peptide derived from human CD42b

Description

CD42b is a platelet activation marker involved in the process of coagulation as an aggregating factor. It interacts with extracellular matrix as well as with adhesion molecules. Its expression and activation seems to be regulated by VEGF and PDGF.

Storage Condition and Buffer

Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.**CD42b Antibody - Protein Information****Name** GP1BA**Function**

GP-Ib, a surface membrane protein of platelets, participates in the formation of platelet plugs by binding to the A1 domain of vWF, which is already bound to the subendothelium.

Cellular Location

Membrane; Single-pass type I membrane protein.

CD42b Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
