

Placental alkaline phosphatase (PLAP) Antibody

Rabbit mAb Catalog # AP91509

Specification

Placental alkaline phosphatase (PLAP) Antibody - Product Information

Application WB, IHC, ICC Primary Accession P05187 Clonality Monoclonal

Other Names

Description

Alkaline phosphatase, placental type; Alkaline phosphatase Regan isozyme; Placental alkaline phosphatase 1; PLAP-1; ALPP; PLAP;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 57954 Da

Placental alkaline phosphatase (PLAP) Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

Placental alkaline phosphatase (PLAP)
PLAP may assist in guiding migratory cells
and transporting specific molecules, such
as fatty acids and immunoglobulins, across

the plasma membrane. The three

tissue-specific APs identified in human, PLAP, germ cell AP (GCAP) and intestinal AP, are 90-98% homologous and their genes are clustered on chromosome 2q. Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

Placental alkaline phosphatase (PLAP) Antibody - Protein Information

Name ALPP (HGNC:439)

Storage Condition and Buffer

Function

Alkaline phosphatase that can hydrolyze various phosphate compounds.

Cellular Location

Cell membrane; Lipid-anchor, GPI-anchor

Tissue Location

Detected in placenta (at protein level).

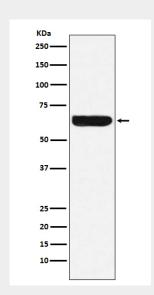

Placental alkaline phosphatase (PLAP) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Placental alkaline phosphatase (PLAP) Antibody - Images

Western blot analysis of Placental alkaline phosphatase (PLAP) expression in HeLa cell lysate.
