

**TRPM7 Antibody**  
Rabbit mAb  
Catalog # AP91591

## Specification

---

### TRPM7 Antibody - Product Information

Application	WB, FC, ICC
Primary Accession	<a href="#">O96QT4</a>
Reactivity	Rat
Clonality	Monoclonal
<b>Other Names</b>	
ALSPDC; CHAK; CHAK1; LTrpC7; TRPM7;	
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	212697 Da

### TRPM7 Antibody - Additional Information

Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human TRPM7
Description	Essential ion channel and serine/threonine-protein kinase. Divalent cation channel permeable to calcium and magnesium. Has a central role in the regulation of anoxic neuronal cell death.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

### TRPM7 Antibody - Protein Information

**Name** TRPM7

**Synonyms** CHAK1, LTRPC7 {ECO:0000303|PubMed:113855}

#### Function

Bifunctional protein that combines an ion channel with an intrinsic kinase domain, enabling it to modulate cellular functions either by conducting ions through the pore or by phosphorylating downstream proteins via its kinase domain. The channel is highly permeable to divalent cations, specifically calcium (Ca<sup>2+</sup>), magnesium (Mg<sup>2+</sup>) and zinc (Zn<sup>2+</sup>) and mediates their influx (PubMed: [11385574](http://www.uniprot.org/citations/11385574)), (PubMed: [12887921](http://www.uniprot.org/citations/12887921)), (PubMed: [15485879](http://www.uniprot.org/citations/15485879)), (PubMed: [24316671](http://www.uniprot.org/citations/24316671)),

PubMed:<a href="http://www.uniprot.org/citations/35561741" target="\_blank">35561741</a>, PubMed:<a href="http://www.uniprot.org/citations/36027648" target="\_blank">36027648</a>). Controls a wide range of biological processes such as Ca<sup>2+</sup>(+), Mg<sup>2+</sup>(+) and Zn<sup>2+</sup>(+) homeostasis, vesicular Zn<sup>2+</sup> release channel and intracellular Ca<sup>2+</sup>(+) signaling, embryonic development, immune responses, cell motility, proliferation and differentiation (By similarity). The C-terminal alpha-kinase domain autophosphorylates cytoplasmic residues of TRPM7 (PubMed:<a href="http://www.uniprot.org/citations/18365021" target="\_blank">18365021</a>). In vivo, TRPM7 phosphorylates SMAD2, suggesting that TRPM7 kinase may play a role in activating SMAD signaling pathways. In vitro, TRPM7 kinase phosphorylates ANXA1 (annexin A1), myosin II isoforms and a variety of proteins with diverse cellular functions (PubMed:<a href="http://www.uniprot.org/citations/15485879" target="\_blank">15485879</a>, PubMed:<a href="http://www.uniprot.org/citations/18394644" target="\_blank">18394644</a>).

### Cellular Location

Cell membrane; Multi-pass membrane protein {ECO:0000250|UniProtKB:Q923J1}. Cytoplasmic vesicle membrane {ECO:0000250|UniProtKB:Q923J1}; Multi-pass membrane protein {ECO:0000250|UniProtKB:Q923J1}. Note=Localized largely in intracellular Zn<sup>2+</sup>-storage vesicles. {ECO:0000250|UniProtKB:Q923J1}

### TRPM7 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### TRPM7 Antibody - Images

Western blot analysis of TRPM7 expression in HeLa cell lysate.
