

SNX1 Antibody

Rabbit mAb Catalog # AP91972

## Specification

# SNX1 Antibody - Product Information

ApplicationWB, IHC, FC, ICCPrimary AccessionQ13596ReactivityRatClonalityMonoclonalOther NamesSnx1; SNX1A; Sorting nexin 1; Sorting nexin 1A; Vps5;

Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	59070 Da

### SNX1 Antibody - Additional Information

Purification	
Immunogen	

Description

Storage Condition and Buffer

Affinity-chromatography A synthesized peptide derived from human SNX1 May be involved in several stages of intracellular trafficking. Plays a role in targeting ligand-activated EGFR to the lysosomes for degradation after endocytosis from the cell surface and release from the Golgi. Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

### **SNX1 Antibody - Protein Information**

Name SNX1

#### **Function**

Involved in several stages of intracellular trafficking. Interacts with membranes containing phosphatidylinositol 3-phosphate (PtdIns(3P)) or phosphatidylinositol 3,5-bisphosphate (PtdIns(3,5)P2) (PubMed:<a href="http://www.uniprot.org/citations/12198132" target="\_blank">12198132</a>). Acts in part as component of the retromer membrane-deforming SNX-BAR subcomplex. The SNX-BAR retromer mediates retrograde transport of cargo proteins from endosomes to the trans-Golgi network (TGN) and is involved in endosome-to-plasma membrane transport for cargo protein recycling. The SNX-BAR subcomplex functions to deform the donor membrane into a tubular profile called endosome-to-TGN transport carrier (ETC) (Probable). Can sense membrane curvature and has in vitro vesicle-to-membrane remodeling activity (PubMed:<a href="http://www.uniprot.org/citations/19816406" target="\_blank">19816406</a>,

PubMed:<a href="http://www.uniprot.org/citations/23085988" target=" blank">23085988</a>). Involved in retrograde endosome-to-TGN transport of lysosomal enzyme receptors (IGF2R, M6PR and SORT1) and Shiginella dysenteria toxin stxB. Plays a role in targeting ligand-activated EGFR to the lysosomes for degradation after endocytosis from the cell surface and release from the Golgi (PubMed:<a href="http://www.uniprot.org/citations/12198132" target=" blank">12198132</a>, PubMed:<a href="http://www.uniprot.org/citations/15498486" target=" blank">15498486</a>, PubMed:<a href="http://www.uniprot.org/citations/17101778" target=" blank">17101778</a>, PubMed:<a href="http://www.uniprot.org/citations/17550970" target=" blank">17550970</a>, PubMed: <a href="http://www.uniprot.org/citations/18088323" target=" blank">18088323</a>, PubMed:<a href="http://www.uniprot.org/citations/21040701" target="\_blank">21040701</a>). Involvement in retromer-independent endocytic trafficking of P2RY1 and lysosomal degradation of protease-activated receptor-1/F2R (PubMed:<a href="http://www.uniprot.org/citations/16407403" target=" blank">16407403</a>, PubMed:<a href="http://www.uniprot.org/citations/20070609" target=" blank">20070609</a>). Promotes KALRN- and RHOG-dependent but retromer-independent membrane remodeling such as lamellipodium formation; the function is dependent on GEF activity of KALRN (PubMed:<a

href="http://www.uniprot.org/citations/20604901" target="\_blank">20604901</a>). Required for endocytosis of DRD5 upon agonist stimulation but not for basal receptor trafficking (PubMed:<a href="http://www.uniprot.org/citations/23152498" target="\_blank">23152498</a>).

#### **Cellular Location**

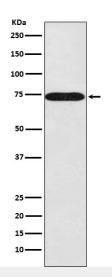

Endosome membrane; Peripheral membrane protein; Cytoplasmic side. Golgi apparatus, trans-Golgi network membrane; Peripheral membrane protein; Cytoplasmic side. Early endosome membrane; Peripheral membrane protein; Cytoplasmic side. Cell projection, lamellipodium. Note=Enriched on tubular elements of the early endosome membrane. Binds preferentially to highly curved membranes enriched in phosphatidylinositol 3-phosphate (PtdIns(3P)) or phosphatidylinositol 3,5-bisphosphate (PtdIns(3,5)P2) (PubMed:15498486). Colocalized with SORT1 to tubular endosomal membrane structures called endosome-to-TGN transport carriers (ETCs) which are budding from early endosome vacuoles just before maturing into late endosome vacuoles (PubMed:18088323). Colocalizes with DNAJC13 and Shiginella dysenteria toxin stxB on early endosomes (PubMed:19874558) Colocalized with F-actin at the leading edge of lamellipodia in a KALRN-dependent manner (PubMed:20604901).

#### SNX1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
- SNX1 Antibody Images

Western blot analysis of SNX1 expression in 293T cell lysate.
