

**LIMK1 Antibody**  
Rabbit mAb  
Catalog # AP92026

## Specification

---

### LIMK1 Antibody - Product Information

Application	WB
Primary Accession	<a href="#">P53667</a>
Reactivity	Rat
Clonality	Monoclonal
<b>Other Names</b>	
LIM kinase; LIMK 1; LIMK;	
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	72585 Da

### LIMK1 Antibody - Additional Information

Purification	<b>Affinity-chromatography</b>
Immunogen	<b>A synthesized peptide derived from human LIM Kinase 1</b>
Description	<b>Protein kinase which regulates actin filament dynamics. Phosphorylates and inactivates the actin binding/depolymerizing factor cofilin, thereby stabilizing the actin cytoskeleton. Stimulates axonal outgrowth and may be involved in brain development. Isoform 3 has a dominant negative effect on actin cytoskeletal changes.</b>
Storage Condition and Buffer	<b>Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.</b>

### LIMK1 Antibody - Protein Information

**Name** LIMK1

**Synonyms** LIMK

#### Function

Serine/threonine-protein kinase that plays an essential role in the regulation of actin filament dynamics. Acts downstream of several Rho family GTPase signal transduction pathways (PubMed: [10436159](http://www.uniprot.org/citations/10436159), PubMed: [11832213](http://www.uniprot.org/citations/11832213), PubMed: [12807904](http://www.uniprot.org/citations/12807904)),

PubMed:<a href="http://www.uniprot.org/citations/15660133" target="\_blank">15660133</a>, PubMed:<a href="http://www.uniprot.org/citations/16230460" target="\_blank">16230460</a>, PubMed:<a href="http://www.uniprot.org/citations/18028908" target="\_blank">18028908</a>, PubMed:<a href="http://www.uniprot.org/citations/22328514" target="\_blank">22328514</a>, PubMed:<a href="http://www.uniprot.org/citations/23633677" target="\_blank">23633677</a>). Activated by upstream kinases including ROCK1, PAK1 and PAK4, which phosphorylate LIMK1 on a threonine residue located in its activation loop (PubMed:<a href="http://www.uniprot.org/citations/10436159" target="\_blank">10436159</a>). LIMK1 subsequently phosphorylates and inactivates the actin binding/depolymerizing factors cofilin-1/CFL1, cofilin-2/CFL2 and destrin/DSTN, thereby preventing the cleavage of filamentous actin (F-actin), and stabilizing the actin cytoskeleton (PubMed:<a href="http://www.uniprot.org/citations/11832213" target="\_blank">11832213</a>, PubMed:<a href="http://www.uniprot.org/citations/15660133" target="\_blank">15660133</a>, PubMed:<a href="http://www.uniprot.org/citations/16230460" target="\_blank">16230460</a>, PubMed:<a href="http://www.uniprot.org/citations/23633677" target="\_blank">23633677</a>). In this way LIMK1 regulates several actin-dependent biological processes including cell motility, cell cycle progression, and differentiation (PubMed:<a href="http://www.uniprot.org/citations/11832213" target="\_blank">11832213</a>, PubMed:<a href="http://www.uniprot.org/citations/15660133" target="\_blank">15660133</a>, PubMed:<a href="http://www.uniprot.org/citations/16230460" target="\_blank">16230460</a>, PubMed:<a href="http://www.uniprot.org/citations/23633677" target="\_blank">23633677</a>). Phosphorylates TPPP on serine residues, thereby promoting microtubule disassembly (PubMed:<a href="http://www.uniprot.org/citations/18028908" target="\_blank">18028908</a>). Stimulates axonal outgrowth and may be involved in brain development (PubMed:<a href="http://www.uniprot.org/citations/18028908" target="\_blank">18028908</a>).

#### Cellular Location

Cytoplasm. Nucleus. Cytoplasm, cytoskeleton. Cell projection, lamellipodium {ECO:0000250|UniProtKB:P53668} Note=Predominantly found in the cytoplasm. Localizes in the lamellipodium in a CDC42BPA, CDC42BPB and FAM89B/LRAP25-dependent manner. {ECO:0000250|UniProtKB:P53668}

#### Tissue Location

Highest expression in both adult and fetal nervous system. Detected ubiquitously throughout the different regions of adult brain, with highest levels in the cerebral cortex. Expressed to a lesser extent in heart and skeletal muscle

#### LIMK1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### LIMK1 Antibody - Images

Western blot analysis of LIM Kinase 1 expression in U-87MG cell lysate.
