### eEF1A1 Antibody - Protein Information

**Name** EEF1A1

**Synonyms** EEF1A, EF1A, LENG7

#### Function

Translation elongation factor that catalyzes the GTP- dependent binding of aminoacyl-tRNA (aa-tRNA) to the A-site of ribosomes during the elongation phase of protein synthesis (PubMed: [26593721](http://www.uniprot.org/citations/26593721), PubMed: [26651998](http://www.uniprot.org/citations/26651998), PubMed: [36123449](http://www.uniprot.org/citations/36123449), PubMed: [36264623](http://www.uniprot.org/citations/36264623), PubMed: [36638793](http://www.uniprot.org/citations/36638793)). Base pairing between the mRNA codon and the aa-tRNA anticodon promotes GTP hydrolysis, releasing the aa-tRNA from EEF1A1 and allowing its accommodation into the ribosome (PubMed: [26593721](http://www.uniprot.org/citations/26593721), PubMed: [26651998](http://www.uniprot.org/citations/26651998), PubMed: [26651998](http://www.uniprot.org/citations/26651998)).

The growing protein chain is subsequently transferred from the P-site peptidyl tRNA to the A-site aa-tRNA, extending it by one amino acid through ribosome-catalyzed peptide bond formation (PubMed:<a href="http://www.uniprot.org/citations/26593721" target="\_blank">26593721</a>, PubMed:<a href="http://www.uniprot.org/citations/26651998" target="\_blank">26651998</a>, PubMed:<a href="http://www.uniprot.org/citations/36123449" target="\_blank">36123449</a>, PubMed:<a href="http://www.uniprot.org/citations/36264623" target="\_blank">36264623</a>). Also plays a role in the positive regulation of IFNG transcription in T-helper 1 cells as part of an IFNG promoter-binding complex with TXK and PARP1 (PubMed:<a href="http://www.uniprot.org/citations/17177976" target="\_blank">17177976</a>).

### Cellular Location

Cytoplasm. Nucleus. Nucleus, nucleolus. Cell membrane. Note=Colocalizes with DLC1 at actin-rich regions in the cell periphery (PubMed:19158340). Translocates together with ZPR1 from the cytoplasm to the nucleus and nucleolus after treatment with mitogens (PubMed:8650580). Localization at the cell membrane depends on EEF1A1 phosphorylation status and the presence of PPP1R16B (PubMed:26497934).
