

HB EGF Antibody

Rabbit mAb Catalog # AP92112

Specification

HB EGF Antibody - Product Information

Application WB
Primary Accession Q99075
Reactivity Rat

Clonality Monoclonal

Other Names

DTR; DTS; DTSF; HB-EGF; HBEGF; HEGFL;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 23067 Da

HB EGF Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

HB EGF

Description May be involved in macrophage-mediated

cellular proliferation. It is mitogenic for fibroblasts and smooth muscle but not

endothelial cells.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

HB EGF Antibody - Protein Information

Name HBEGF

Synonyms DTR, DTS, HEGFL

Function

Growth factor that mediates its effects via EGFR, ERBB2 and ERBB4. Required for normal cardiac valve formation and normal heart function. Promotes smooth muscle cell proliferation. May be involved in macrophage-mediated cellular proliferation. It is mitogenic for fibroblasts, but not endothelial cells. It is able to bind EGF receptor/EGFR with higher affinity than EGF itself and is a far more potent mitogen for smooth muscle cells than EGF. Also acts as a diphtheria toxin receptor.

Cellular Location

[Heparin-binding EGF-like growth factor]: Secreted, extracellular space. Note=Mature HB-EGF is released into the extracellular space and probably binds to a receptor

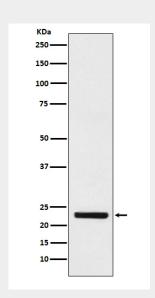

HB EGF Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

HB EGF Antibody - Images

Western blot analysis of HB EGF expression in K562 cell lysate.
