

RanBP9 Antibody

Rabbit mAb Catalog # AP92568

Specification

RanBP9 Antibody - Product Information

Application WB, ICC
Primary Accession Q96S59
Reactivity Rat

Clonality Monoclonal

Other Names

BPM90; BPML; IBAP 1; Imp 9; Importin 9; Ran BP9; Ran-binding protein 9; RanBP7; RanBP9;

RanBPM;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 77847 Da

RanBP9 Antibody - Additional Information

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

RanBP9

Description May act as an adapter protein to couple

membrane receptors to intracellular signaling pathways. May be involved in signaling of ITGB2/LFA-1 and other

integrins. Enhances HGF-MET signaling by recruiting Sos and activating the Ras pathway. Involved in activation of

androgen and glucocorticoid receptor in the presence of their cognate hormones. Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide

and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

RanBP9 Antibody - Protein Information

Name RANBP9

Synonyms RANBPM

Storage Condition and Buffer

Function

May act as scaffolding protein, and as adapter protein to couple membrane receptors to intracellular signaling pathways (Probable). Acts as a mediator of cell spreading and actin cytoskeleton rearrangement (PubMed:18710924). Core component of the CTLH E3 ubiquitin-protein ligase

complex that selectively accepts ubiquitin from UBE2H and mediates ubiquitination and subsequent proteasomal degradation of the transcription factor HBP1 (PubMed:29911972). May be involved in signaling of ITGB2/LFA-1 and other integrins (PubMed:14722085). Enhances HGF-MET signaling by recruiting Sos and activating the Ras pathway (PubMed:12147692). Enhances dihydrotestosterone-induced transactivation activity of AR, as well as dexamethasone-induced transactivation activity of NR3C1, but not affect estrogen-induced transactivation (PubMed:1236194518222118). Stabilizes TP73 isoform Alpha, probably by inhibiting its ubiquitination, and increases its proapoptotic activity (PubMed:15558019<a href="http://www.uniprot.org/citations

Cellular Location

Cytoplasm. Nucleus. Cell membrane; Peripheral membrane protein. Note=The unphosphorylated form is predominantly cytoplasmic. A phosphorylated form is associated with the plasma membrane.

Tissue Location

Ubiquitously expressed, with highest levels in testes, placenta, heart, and muscle, and lowest levels in lung. Within the brain, expressed predominantly by neurons in the gray matter of cortex, the granular layer of cerebellum and the Purkinje cells

RanBP9 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
