

Phospho-MCM2 (S27) Antibody Rabbit mAb Catalog # AP92869

## **Specification**

# Phospho-MCM2 (S27) Antibody - Product Information

ApplicationWB, IHC, ICC, IPPrimary AccessionP49736ReactivityRatClonalityMonoclonalOther NamesBM28; CCNL1; cdc19; CDCL1; Cyclin like 1; MCM2;

Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	<b>101896</b> Da

## Phospho-MCM2 (S27) Antibody - Additional Information

Purification	Affinity-chromatography A synthesized peptide derived from human
Immunogen	Phospho-MCM2 (S27)
Description	Acts as component of the MCM2-7 complex
	(MCM complex) which is the putative
	replicative helicase essential for 'once per
	cell cycle' DNA replication initiation and
	elongation in eukaryotic cells.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline ,
	pH 7.4, 150mM NaCl, 0.02% sodium azide
	and 50% glycerol. Store at +4°C short
	term. Store at -20°C long term. Avoid
	freeze / thaw cycle.

## Phospho-MCM2 (S27) Antibody - Protein Information

## Name MCM2 (HGNC:6944)

## Function

Acts as a component of the MCM2-7 complex (MCM complex) which is the replicative helicase essential for 'once per cell cycle' DNA replication initiation and elongation in eukaryotic cells. Core component of CDC45-MCM-GINS (CMG) helicase, the molecular machine that unwinds template DNA during replication, and around which the replisome is built (PubMed:<a href="http://www.uniprot.org/citations/32453425" target="\_blank">32453425</a>, PubMed:<a href="http://www.uniprot.org/citations/34694004" target="\_blank">32453425</a>, PubMed:<a href="http://www.uniprot.org/citations/34694004" target="\_blank">34694004</a>, PubMed:<a href="http://www.uniprot.org/citations/34700328" target="\_blank">34700328</a>, PubMed:<a href="http://www.uniprot.org/citations/345585232" target="\_blank">35585232</a>). The active ATPase sites in the MCM2-7 ring are formed through the interaction surfaces of two neighboring subunits such that a critical structure of a conserved arginine finger motif is provided in trans relative to the ATP-binding site of the Walker A box of the adjacent subunit. The six ATPase active

sites, however, are likely to contribute differentially to the complex helicase activity (PubMed:<a href="http://www.uniprot.org/citations/32453425" target="\_blank">32453425</a>). Required for the entry in S phase and for cell division (PubMed:<a

href="http://www.uniprot.org/citations/8175912" target="\_blank">8175912</a>). Plays a role in terminally differentiated hair cells development of the cochlea and induces cells apoptosis (PubMed:<a href="http://www.uniprot.org/citations/26196677" target="\_blank">26196677</a>).

#### **Cellular Location**

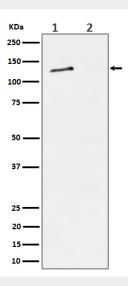

Nucleus. Chromosome. Note=Associated with chromatin before the formation of nuclei and detaches from it as DNA replication progresses. {ECO:0000250|UniProtKB:P55861}

## Phospho-MCM2 (S27) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

#### Phospho-MCM2 (S27) Antibody - Images

Western blot analysis of Phospho-MCM2 (S27) expression in (1) HeLa cell lysate; (2) HeLa cell treated with alkaline phosphatase lysate.
