

ABCD1 / ALD Antibody
Rabbit mAb
Catalog # AP93103**Specification****ABCD1 / ALD Antibody - Product Information**

Application	WB, FC, ICC
Primary Accession	P33897
Reactivity	Rat
Clonality	Monoclonal
Other Names	
ABC42; Abcd1; ALD; Aldgh; ALDP; AMN;	
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	82937 Da

ABCD1 / ALD Antibody - Additional Information

Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human ABCD1 / ALD
Description	Probable transporter. The nucleotide-binding fold acts as an ATP-binding subunit with ATPase activity.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

ABCD1 / ALD Antibody - Protein InformationName ABCD1 ([HGNC:61](#))

Synonyms ALD

Function

ATP-dependent transporter of the ATP-binding cassette (ABC) family involved in the transport of very long chain fatty acid (VLCFA)- CoA from the cytosol to the peroxisome lumen (PubMed:11248239, PubMed:15682271, PubMed:16946495, PubMed:18757502, PubMed:21145416, PubMed:23671276, PubMed:29397936, PubMed:33500543). Coupled to the ATP- dependent transporter activity has also a fatty acyl-CoA thioesterase activity (ACOT) and

hydrolyzes VLCFA-CoA into VLCFA prior their ATP- dependent transport into peroxisomes, the ACOT activity is essential during this transport process (PubMed:29397936, PubMed:33500543). Thus, plays a role in regulation of VLCFAs and energy metabolism namely, in the degradation and biosynthesis of fatty acids by beta-oxidation, mitochondrial function and microsomal fatty acid elongation (PubMed:21145416, PubMed:23671276). Involved in several processes; namely, controls the active myelination phase by negatively regulating the microsomal fatty acid elongation activity and may also play a role in axon and myelin maintenance. Controls also the cellular response to oxidative stress by regulating mitochondrial functions such as mitochondrial oxidative phosphorylation and depolarization. And finally controls the inflammatory response by positively regulating peroxisomal beta-oxidation of VLCFAs (By similarity).

Cellular Location

Peroxisome membrane; Multi-pass membrane protein. Mitochondrion membrane; Multi-pass membrane protein. Lysosome membrane; Multi-pass membrane protein Endoplasmic reticulum membrane; Multi- pass membrane protein

ABCD1 / ALD Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
