KRA51 Rabbit Polyclonal Antibody - Protein Information

Name KRTAP5-1

Synonyms KAP5.1, KRN1L, KRTAP5.1

Function

In the hair cortex, hair keratin intermediate filaments are embedded in an interfilamentous matrix, consisting of hair keratin-associated protein (KRTAP), which are essential for the formation of a rigid and resistant hair shaft through their extensive disulfide bond cross-linking with abundant cysteine residues of hair keratins. The matrix proteins include the high-sulfur and high-glycine-tyrosine keratins.

Tissue Location

Expressed in hair root but not in skin. Expressed also in lung, pancreas, ovary, testis.
