

POK6 Rabbit Polyclonal Antibody
POK6 Rabbit Polyclonal Antibody
Catalog # AP93412**Specification**

POK6 Rabbit Polyclonal Antibody - Product Information

Application	WB
Primary Accession	P63133
Reactivity	Rat, Human
Host	Polyclonal, Rabbit, IgG
Clonality	Polyclonal
Calculated MW	107703

POK6 Rabbit Polyclonal Antibody - Additional Information**Other Names**

Endogenous retrovirus group K member 8 Pol protein, HERV-K115 Pol protein, HERV-K_8p23.1 provirus ancestral Pol protein, Reverse transcriptase, RT, 2.7.7.49, Ribonuclease H, RNase H, 3.1.26.4, Integrase, IN, ERVK-8

Storage Conditions

-20°C

POK6 Rabbit Polyclonal Antibody - Protein Information

Name ERVK-8

Function

Early post-infection, the reverse transcriptase converts the viral RNA genome into double-stranded viral DNA. The RNase H domain of the reverse transcriptase performs two functions. It degrades the RNA template and specifically removes the RNA primer from the RNA/DNA hybrid. Following nuclear import, the integrase catalyzes the insertion of the linear, double-stranded viral DNA into the host cell chromosome. Endogenous Pol proteins may have kept, lost or modified their original function during evolution.

POK6 Rabbit Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

- [Cell Culture](#)

POK6 Rabbit Polyclonal Antibody - Images

Western blot analysis of lysates from U2OS cells, primary antibody was diluted at 1:1000, 4° over night
