

FXYD3 Rabbit Polyclonal Antibody

FXYD3 Rabbit Polyclonal Antibody Catalog # AP93538

Specification

FXYD3 Rabbit Polyclonal Antibody - Product Information

Application IHC, IF Primary Accession Q14802

Reactivity
Host
Rat, Human, Mouse
Polyclonal, Rabbit,IgG

Clonality Polyclonal Calculated MW 9263

FXYD3 Rabbit Polyclonal Antibody - Additional Information

Gene ID 5349

Other Names

FXYD domain-containing ion transport regulator 3, Chloride conductance inducer protein Mat-8, Mammary tumor 8 kDa protein, Phospholemman-like, Sodium/potassium-transporting ATPase subunit FXYD3, FXYD3, MAT8, PLML

Storage Conditions

-20°C

FXYD3 Rabbit Polyclonal Antibody - Protein Information

Name FXYD3

Synonyms MAT8, PLML

Function

Associates with and regulates the activity of the sodium/potassium-transporting ATPase (NKA) which transports Na(+) out of the cell and K(+) into the cell (PubMed:17077088). Reduces glutathionylation of the NKA beta-1 subunit ATP1B1, thus reversing glutathionylation-mediated inhibition of ATP1B1 (PubMed:21454534). Induces a hyperpolarization-activated chloride current when expressed in Xenopus oocytes (PubMed:7836447).

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Isoform 1: Expressed mainly in differentiated cells (at protein level). Isoform 2: Expressed mainly in undifferentiated cells (at protein level).

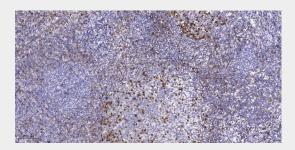

FXYD3 Rabbit Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

FXYD3 Rabbit Polyclonal Antibody - Images

Immunohistochemical analysis of paraffin-embedded human tonsil. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).

FXYD3 Rabbit Polyclonal Antibody - Background

This gene belongs to a small family of FXYD-domain containing regulators of Na+/K+ ATPases which share a 35-amino acid signature sequence domain, beginning with the sequence PFXYD, and containing 7 invariant and 6 highly conserved amino acids. This gene encodes a cell membrane protein that may regulate the function of ion-pumps and ion-channels. This gene may also play a role in tumor progression. Alternative splicing results in multiple transcript variants encoding distinct isoforms.[provided by RefSeq, Oct 2008],
