

**EVPL (18V7) Rabbit Monoclonal Antibody**  
**EVPL (18V7) Rabbit Monoclonal Antibody**  
**Catalog # AP93815****Specification**

---

**EVPL (18V7) Rabbit Monoclonal Antibody - Product Information**

Application	WB, IHC
Primary Accession	<a href="#">O92817</a>
Reactivity	Human
Clonality	Monoclonal
Calculated MW	231604

**EVPL (18V7) Rabbit Monoclonal Antibody - Additional Information****Gene ID** 2125**Other Names**

Envoplakin, 210 kDa cornified envelope precursor protein, 210 kDa paraneoplastic pemphigus antigen, p210, EVPL

**Storage Conditions**

-20°C

**EVPL (18V7) Rabbit Monoclonal Antibody - Protein Information****Name** EVPL**Function**

Component of the cornified envelope of keratinocytes. May link the cornified envelope to desmosomes and intermediate filaments.

**Cellular Location**

Cell junction, desmosome. Cornified envelope. Cytoplasm, cytoskeleton. Note=Colocalized with DSP at desmosomes and along intermediate filaments

**Tissue Location**

Exclusively expressed in stratified squamous epithelia

**EVPL (18V7) Rabbit Monoclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Western blot analysis of extracts from HeLa T24 cells using AP93815 at 1:1000.

#### EVPL (18V7) Rabbit Monoclonal Antibody - Background

This gene encodes a member of the plakin family of proteins that forms a component of desmosomes and the epidermal cornified envelope. This gene is located in the tylosis oesophageal cancer locus on chromosome 17q25, and its deletion is associated with both familial and sporadic forms of oesophageal squamous cell carcinoma. Patients suffering from the autoimmune mucocutaneous disorder, paraneoplastic pemphigus, develop antibodies against the encoded protein. [provided by RefSeq, Jul 2016]
