

PTPRD Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP9589A

Specification

PTPRD Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	P23468
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	343-371

PTPRD Antibody (N-term) - Additional Information

Gene ID 5789

Other Names

Receptor-type tyrosine-protein phosphatase delta, Protein-tyrosine phosphatase delta, R-PTP-delta, PTPRD

Target/Specificity

This PTPRD antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 343-371 amino acids from the N-terminal region of human PTPRD.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PTPRD Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

PTPRD Antibody (N-term) - Protein Information

Name PTPRD

Function Can bidirectionally induce pre- and post-synaptic differentiation of neurons by mediating interaction with IL1RAP and IL1RAPL1 trans-synaptically. Involved in pre-synaptic differentiation through interaction with SLITRK2.

Cellular Location

Membrane; Single-pass type I membrane protein.

PTPRD Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PTPRD Antibody (N-term) - Images

Western blot analysis of PTPRD Antibody (N-term) (Cat. #AP9589a) in HeLa cell line lysates (35ug/lane). PTPRD (arrow) was detected using the purified Pab.

PTPRD Antibody (N-term) - Background

PTPRD is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP contains an extracellular region, a single transmembrane segment and two tandem intracytoplasmic catalytic domains, and thus represents a receptor-type PTP. The extracellular region of this protein is composed of three Ig-like and eight fibronectin type III-like domains. Studies of the similar genes in chicken and fly suggest the role of this PTP is in promoting neurite growth, and regulating neurons axon guidance.
