

AMH Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP9940C

Specification

AMH Antibody (Center) - Product Information

Application	WB, IHC-P, FC,E
Primary Accession	P03971
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	424-451

AMH Antibody (Center) - Additional Information

Gene ID 268

Other Names

Muellerian-inhibiting factor, Anti-Muellerian hormone, AMH, Muellerian-inhibiting substance, MIS, AMH, MIF

Target/Specificity

This AMH antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 424-451 amino acids of human AMH.

Dilution

WB~~1:1000-1:2000

IHC-P~~1:25

FC~~1:25

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

AMH Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

AMH Antibody (Center) - Protein Information

Name AMH ([HGNC:464](#))

Synonyms MIF

Function Plays an important role in several reproductive functions. Induces Mullerian duct regression during male fetal sexual differentiation (PubMed:[34155118](#), PubMed:[3754790](#), PubMed:[8469238](#)). Also plays a role in Leydig cell differentiation and function (By similarity). In female acts as a negative regulator of the primordial to primary follicle transition and decreases FSH sensitivity of growing follicles (PubMed:[14742691](#)). AMH signals by binding to a specific type-II receptor, AMHR2, that heterodimerizes with type-I receptors (ACVR1 and BMPRI1A), and recruiting SMAD proteins that are translocated to the nucleus to regulate target gene expression (PubMed:[20861221](#), PubMed:[34155118](#)).

Cellular Location

Secreted

Tissue Location

In ovaries, AMH is detected in granulosa cells of early growing follicles.

AMH Antibody (Center) - Images

All lanes : Anti-AMH Antibody (Center) at 1:1000-1:2000 dilution Lane 1: Human cerebellum lysate Lane 2: HeLa whole cell lysate Lane 3: HepG2 whole cell lysate Lane 4: SH-SY5Y whole cell lysate Lane 5: U-87 MG whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 59 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

AP9940c staining AMH in human cerebellum tissue sections by Immunohistochemistry (IHC-P - paraformaldehyde-fixed, paraffin-embedded sections). Tissue was fixed with formaldehyde and blocked with 3% BSA for 0.5 hour at room temperature; antigen retrieval was by heat mediation with a citrate buffer (pH6). Samples were incubated with primary antibody (1/25) for 1 hour at 37°C. A undiluted biotinylated goat polyvalent antibody was used as the secondary antibody.

Overlay histogram showing SH-SY5Y cells stained with AP9940c (green line). The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were then incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody (AP9940c, 1:25 dilution) for 60 min at 37°C. The secondary antibody used was Goat-Anti-Rabbit IgG, DyLight® 488 Conjugated Highly Cross-Adsorbed (OH191631) at 1/200 dilution for 40 min at 37°C. Isotype control antibody (blue line) was rabbit IgG1 (1 µg/1x10⁶ cells) used under the same conditions. Acquisition of >10,000 events was performed.

AMH Antibody (Center) - Background

Anti-müllerian hormone (AMH) is a member of the TGF beta superfamily. It is secreted as a homodimeric 140kD disulphide-linked precursor that is cleaved to release the mature 30kD homodimer. Originally classified as a foetal testicular hormone that inhibits Müllerian duct development, AMH is expressed post-natally by immature Sertoli cells, and to a lesser degree by granulosa cells. AMH plays a role in testicular differentiation and in the regulation of ovarian follicle growth.
