

SP B
Rabbit Polyclonal Antibody (Mab)
Catalog # APA333

Specification

SP B - Product Information

| | |
|-------------------|------------------------|
| Application | IHC |
| Primary Accession | O92560 |
| Host | Rabbit |
| Clonality | Polyclonal |
| Calculated MW | 80362 Da |

SP B - Additional Information

| | |
|-----------|--|
| Gene ID | 8314 |
| Gene Name | BAP1 {ECO:0000303 PubMed:9528852, ECO:0000312 HGNC:HGNC:950} |

Other Names

Ubiquitin carboxyl-terminal hydrolase BAP1, 3.4.19.12, BRCA1-associated protein 1, Cerebral protein 6 {ECO:0000303|Ref.2}, BAP1 {ECO:0000303|PubMed:9528852, ECO:0000312|HGNC:HGNC:950}

| | |
|-------------|---|
| Storage | Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles. |
| Precautions | SP B is for research use only and not for use in diagnostic or therapeutic procedures. |

SP B - Protein Information

Name BAP1 {ECO:0000303|PubMed:9528852, ECO:0000312|HGNC:HGNC:950}

| | |
|----------|--|
| Function | Deubiquitinating enzyme that plays a key role in chromatin by mediating deubiquitination of histone H2A and HCFC1 (PubMed: 12485996 , PubMed: 18757409 , PubMed: 20436459 , PubMed: 25451922). Catalytic component of the PR-DUB complex, a complex that specifically mediates deubiquitination of histone H2A monoubiquitinated at 'Lys-119' (H2AK119ub1) (PubMed: 20436459 , PubMed: 25451922). Does not deubiquitinate monoubiquitinated histone H2B (PubMed: 20436459). Acts as a regulator of cell growth by mediating deubiquitination of HCFC1 N- terminal and |
|----------|--|

| | |
|-------------------|--|
| Cellular Location | <p>C-terminal chains, with some specificity toward 'Lys-48'- linked polyubiquitin chains compared to 'Lys-63'-linked polyubiquitin chains (PubMed:19188440, PubMed:19815555). Deubiquitination of HCFC1 does not lead to increase stability of HCFC1 (PubMed:19188440, PubMed:19815555). Interferes with the BRCA1 and BARD1 heterodimer activity by inhibiting their ability to mediate ubiquitination and autoubiquitination (PubMed:19117993). It however does not mediate deubiquitination of BRCA1 and BARD1 (PubMed:19117993). Able to mediate autodeubiquitination via intramolecular interactions to counteract monoubiquitination at the nuclear localization signal (NLS), thereby protecting it from cytoplasmic sequestration (PubMed:24703950). Acts as a tumor suppressor (PubMed:9528852). Cytoplasm. Nucleus. Note=Mainly nuclear. Binds to chromatin Localizes to the cytoplasm when monoubiquitinated by the E2/E3 hybrid ubiquitin-protein ligase UBE2O (PubMed:24703950)</p> |
| Tissue Location | <p>Highly expressed in testis, placenta and ovary. Expressed in breast.</p> |

SP B - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
