

**Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9)
Recombinant Antibody
Catalog # APR11003****Specification**

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) - Product Information

Application	FC, E, FTA
Primary Accession	Q8NBP7
Reactivity	Cynomolgus, Human
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	145 KDa

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) - Additional Information**Target/Specificity**
PCSK9**Endotoxin**

< 0.001EU/ µg, determined by LAL method.

Conjugation

Unconjugated

Expression system

CHO Cell

Format

Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Storage

-80°C for 2 years under sterile conditions □ -20°C for 1 year under sterile conditions □ Avoid repeated freeze-thaw cycles.

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) - Protein Information

Name PCSK9

Synonyms NARC1

Function

Crucial player in the regulation of plasma cholesterol homeostasis. Binds to low-density lipoprotein receptor family members: low density lipoprotein receptor (LDLR), very low density lipoprotein receptor (VLDLR), apolipoprotein E receptor (LRP1/APOER) and apolipoprotein receptor 2 (LRP8/APOER2), and promotes their degradation in intracellular acidic compartments (PubMed: [18039658](http://www.uniprot.org/citations/18039658)). Acts via a non- proteolytic mechanism to enhance the degradation of the hepatic LDLR through a clathrin

LDLRAP1/ARH-mediated pathway. May prevent the recycling of LDLR from endosomes to the cell surface or direct it to lysosomes for degradation. Can induce ubiquitination of LDLR leading to its subsequent degradation (PubMed: [17461796](http://www.uniprot.org/citations/17461796), PubMed: [18197702](http://www.uniprot.org/citations/18197702), PubMed: [18799458](http://www.uniprot.org/citations/18799458), PubMed: [22074827](http://www.uniprot.org/citations/22074827)). Inhibits intracellular degradation of APOB via the autophagosome/lysosome pathway in a LDLR-independent manner. Involved in the disposal of non-acetylated intermediates of BACE1 in the early secretory pathway (PubMed: [18660751](http://www.uniprot.org/citations/18660751)). Inhibits epithelial Na(+) channel (ENaC)-mediated Na(+) absorption by reducing ENaC surface expression primarily by increasing its proteasomal degradation. Regulates neuronal apoptosis via modulation of LRP8/APOER2 levels and related anti-apoptotic signaling pathways.

Cellular Location

Cytoplasm. Secreted. Endosome. Lysosome. Cell surface. Endoplasmic reticulum. Golgi apparatus. Note=Autocatalytic cleavage is required to transport it from the endoplasmic reticulum to the Golgi apparatus and for the secretion of the mature protein Localizes to the endoplasmic reticulum in the absence of LDLR and colocalizes to the cell surface and to the endosomes/lysosomes in the presence of LDLR. The sorting to the cell surface and endosomes is required in order to fully promote LDLR degradation

Tissue Location

Expressed in neuro-epithelioma, colon carcinoma, hepatic and pancreatic cell lines, and in Schwann cells

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) - Images

Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 95%

The purity of Anti-PCSK9 Reference Antibody (Boehringer anti-PCSK9) is more than 95%, determined by SEC-HPLC.
