

**APC3 Antibody**  
Catalog # ASC11115**Specification****APC3 Antibody - Product Information**

|                   |   |
|-------------------|---|
| Application       | WB, IHC   |
| Primary Accession | <a href="#">P30260</a>  |
| Other Accession   | <a href="#">NP_001247</a> , <a href="#">167466175</a>   |
| Reactivity        | Human, Mouse, Rat   |
| Host              | Rabbit  |
| Clonality         | Polyclonal  |
| Isotype           | IgG   |
| Application Notes | APC3 antibody can be used for detection of APC3 by Western blot at 1 - 2 µg/mL. Antibody can also be used for immunohistochemistry starting at 5 µg/mL. |

**APC3 Antibody - Additional Information**

|                    |     |
|--------------------|-----|
| Gene ID            | 996 |
| Target/Specificity |     |
| CDC27;             |     |

**Reconstitution & Storage**

APC3 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

**Precautions**

APC3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**APC3 Antibody - Protein Information**

**Name** CDC27

**Synonyms** ANAPC3, D0S1430E, D17S978E

**Function**

Component of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated E3 ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle (PubMed:<a href="http://www.uniprot.org/citations/18485873" target="\_blank">18485873</a>). The APC/C complex acts by mediating ubiquitination and subsequent degradation of target proteins: it mainly mediates the formation of 'Lys-11'-linked polyubiquitin chains and, to a lower extent, the formation of 'Lys-48'- and 'Lys-63'-linked polyubiquitin chains (PubMed:<a href="http://www.uniprot.org/citations/18485873" target="\_blank">18485873</a>). The APC/C complex catalyzes assembly of branched 'Lys-11'-/'Lys-48'-linked branched ubiquitin chains on target proteins (PubMed:<a href="http://www.uniprot.org/citations/29033132" target="\_blank">29033132</a>).

target="\_blank">29033132</a>).

### Cellular Location

Nucleus. Cytoplasm, cytoskeleton, spindle

### APC3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### APC3 Antibody - Images

Western blot analysis of APC3 in mouse liver tissue lysate with APC3 antibody at (A) 1 and (B) 2  $\mu\text{g/mL}$ .

Immunohistochemistry of APC3 in rat liver tissue with APC3 antibody at 5  $\mu\text{g/mL}$ .

### APC3 Antibody - Background

APC3 Antibody: Cell cycle regulated protein ubiquitination and degradation within subcellular domains is thought to be essential for the normal progression of mitosis. APC3, also known as

CDC27, a highly conserved component of the anaphase promoting complex/cyclosome (APC/C), is a cell cycle-regulated E3 ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle. APC/C is responsible for degrading anaphase inhibitors, mitotic cyclins, and spindle-associated proteins ensuring that events of mitosis take place in proper sequence. APC3 contains a tetratricopeptide repeat (TPR) region and interacts with mitotic checkpoint proteins including Mad2, p55CDC and BUBR1.
