

RNASET2 Antibody
Catalog # ASC11454**Specification****RNASET2 Antibody - Product Information**

Application	WB, ICC, IF
Primary Accession	O00584
Other Accession	NP_003721 , 5231228
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	RNASET2 antibody can be used for detection of FOXRED2 by Western blot at 1 µg/mL.

RNASET2 Antibody - Additional Information

Gene ID	8635
Target/Specificity	RNASET2;

Reconstitution & Storage

RNASET2 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

RNASET2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

RNASET2 Antibody - Protein Information

Name RNASET2

Synonyms RNASE6PL

Function

Ribonuclease that plays an essential role in innate immune response by recognizing and degrading RNAs from microbial pathogens that are subsequently sensed by TLR8 (PubMed: [31778653](http://www.uniprot.org/citations/31778653)). Cleaves preferentially single-stranded RNA molecules between purine and uridine residues, which critically contributes to the supply of catabolic uridine and the generation of purine-2',3'-cyclophosphate-terminated oligoribonucleotides (PubMed: [31778653](http://www.uniprot.org/citations/31778653)). In turn, RNase T2 degradation products promote the RNA-dependent activation of TLR8 (PubMed: [31778653](http://www.uniprot.org/citations/31778653)). Also plays a key role in degradation of mitochondrial RNA and processing of non-coding RNA imported from the cytosol into mitochondria (PubMed: [28730546](http://www.uniprot.org/citations/28730546))

target="_blank">28730546, PubMed:30184494). Participates as well in degradation of mitochondrion-associated cytosolic rRNAs (PubMed:30385512).

Cellular Location

Secreted. Lysosome lumen. Endoplasmic reticulum lumen. Mitochondrion intermembrane space. Note=Full-length RNASET2 is found in the endoplasmic reticulum while smaller RNASET2 proteolytic products are found in the lysosome fraction.

Tissue Location

Ubiquitous. Higher expression levels observed in the temporal lobe and fetal brain.

RNASET2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

RNASET2 Antibody - Images

Western blot analysis of RNASET2 in SW480 cell lysate with RNASET2 antibody at 1 μ g/mL in (A) the absence and (B) the presence of blocking peptide.

Immunocytochemistry of RNASET2 in SW480 cells with RNASET2 antibody at 2.5 µg/ml.

Immunofluorescence of RNASET2 in SW480 cells with RNASET2 antibody at 5 µg/ml.

RNASET2 Antibody - Background

RNASET2 Antibody: RNASET2 is a novel member of the Rh/T2/S-glycoprotein class of extracellular ribonucleases. It is a single copy gene that maps to 6q27, a region associated with human malignancies and chromosomal rearrangement, and has been suggested to function as a tumor suppressor protein. Its expression is suppressed in Human T-cell Leukemia Virus type 1 (HTLV-1) infected cells following the binding of the HTLV-1 Tax protein to the RNASET2 promoter. As Adult T-cell leukemia (ATL) is one of the primary diseases caused by HTLV-1 infection, a reduction in the level of RNASET2 by Tax may play a role in ATL development.
