

ACSL1 Antibody
Catalog # ASC11566**Specification****ACSL1 Antibody - Product Information**

Application	WB, IF
Primary Accession	P33121
Other Accession	NP_001986 , 40807491
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	77 kDa KDa
Application Notes	ACSL1 antibody can be used for detection of ACSL1 by Western blot at 1 - 2 µg/mL. For immunofluorescence start at 20 µg/mL.

ACSL1 Antibody - Additional InformationGene ID **2180****Target/Specificity**

ACSL1; At least three isoforms of ACSL1 are known to exist; this antibody will detect all three isoforms.

Reconstitution & Storage

ACSL1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

ACSL1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ACSL1 Antibody - Protein InformationName ACSL1 ([HGNC:3569](#))**Function**

Catalyzes the conversion of long-chain fatty acids to their active form acyl-CoAs for both synthesis of cellular lipids, and degradation via beta-oxidation (PubMed: [21242590](http://www.uniprot.org/citations/21242590), PubMed: [22633490](http://www.uniprot.org/citations/22633490), PubMed: [24269233](http://www.uniprot.org/citations/24269233)). Preferentially uses palmitoleate, oleate and linoleate (PubMed: [24269233](http://www.uniprot.org/citations/24269233)). Preferentially activates arachidonate than epoxyeicosatrienoic acids (EETs) or hydroxyeicosatrienoic acids (HETEs) (By similarity).

Cellular Location

Mitochondrion outer membrane; Single-pass type III membrane protein. Peroxisome membrane; Single-pass type III membrane protein. Microsome membrane; Single-pass type III membrane protein. Endoplasmic reticulum membrane; Single-pass type III membrane protein

Tissue Location

Highly expressed in liver, heart, skeletal muscle, kidney and erythroid cells, and to a lesser extent in brain, lung, placenta and pancreas.

ACSL1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

ACSL1 Antibody - Images

Western blot analysis of ACSL1 in human lung tissue lysate with ACSL1 antibody at (A) 1 and (B) 2 µg/mL.

Immunofluorescence of ASCL1 in human lung tissue with ASCL1 antibody at 20 µg/mL.

ACSL1 Antibody - Background

ACSL1 Antibody: Long-chain acyl coenzyme A synthetase 1 (ACSL1) catalyzes the synthesis of acyl-CoA from long-chain fatty acids in an ATP-dependent manner. ACSL1 is a member of a family of long-chain acyl-CoA synthetases which differ in substrate preference, tissue expression, and subcellular localization. In mouse, ACSL1 is the major acyl-CoA enzyme in the heart, providing 60-90% of heart ATP. Loss of ACSL1 either globally or in heart ventricles resulted in impaired fatty acid oxidation, activation of the mammalian target of rapamycin (mTOR), and cardiac hypertrophy.
